Therapeutic Equivalence Evaluations

PREFACE TO EIGHTEENTH EDITION

The publication, *Approved Drug Products with Therapeutic Equivalence Evaluations* (the List), identifies drug products approved on the basis of safety and effectiveness by the Food and Drug Administration (FDA) under the Federal Food, Drug, and Cosmetic Act (the Act). Drugs on the market approved only on the basis of safety (covered by the ongoing Drug Efficacy Study Implementation [DESI] review [e.g., Donnatal® Tablets and Librax® Capsules] or pre-1938 drugs [e.g., Phenobarbital Tablets]) are not included in this publication. The main criterion for the inclusion of any product is that the product is the subject of an application with an effective approval that has not been withdrawn for safety or efficacy reasons. Inclusion of products on the List is independent of any current regulatory action through administrative or judicial means against a drug product. In addition, the List contains therapeutic equivalence evaluations for approved multisource prescription drug products. These evaluations have been prepared to serve as public information and advice to state health agencies, prescribers, and pharmacists to promote public education in the area of drug product selection and to foster containment of health care costs. Therapeutic equivalence evaluations in this publication are not official FDA actions affecting the legal status of products under the Act.

Background of the Publication. To contain drug costs, virtually every state has adopted laws and/or regulations that encourage the substitution of drug products. These state laws generally require either that substitution be limited to drugs on a specific list (the positive formulary approach) or that it be permitted for all drugs except those prohibited by a particular list (the negative formulary approach). Because of the number of requests in the late 1970s for FDA assistance in preparing both positive and negative formularies, it became apparent that FDA could not serve the needs of each state on an individual basis. The Agency also recognized that providing a single list based on common criteria would be preferable to evaluating drug products on the basis of differing definitions and criteria in various state laws. As a result, on May 31, 1978, the Commissioner of the Food and Drug Administration sent a letter to officials of each state stating FDA's intent to provide a list of all prescription drug products that are approved by FDA for safety and effectiveness, along with therapeutic equivalence determinations for multisource prescription products.

The List was distributed as a proposal in January 1979. It included only currently marketed prescription drug products approved by FDA through new drug applications (NDAs) and abbreviated new drug applications (ANDAs) under the provisions of Section 505 of the Act.

The therapeutic equivalence evaluations in the List reflect FDA's application of specific criteria to the approved multisource prescription drug products on the List. These evaluations are presented in the form of code letters that indicate the basis for the evaluation made. An explanation of the code appears in the *Introduction*.

A complete discussion of the background and basis of FDA's therapeutic equivalence evaluation policy was published in the *Federal Register* on January 12, 1979 (44 FR 2932). The final rule, which includes FDA's responses to the public comments on the proposal, was published in the *Federal Register* on October 31, 1980

FDA data supplied by DrugPatentWatch.com

(45 FR 72582). The first publication, October 1980, of the final version of the List incorporated appropriate corrections and additions. Each subsequent edition has included the new approvals and made appropriate changes in data.

On September 24, 1984, the President signed into law the Drug Price Competition and Patent Term Restoration Act (1984 Amendments). The 1984 Amendments require that FDA, among other things, make publicly available a list of approved drug products with monthly supplements. The *Approved Drug Products with Therapeutic Equivalence Evaluations* publication and its monthly Cumulative Supplements satisfy this requirement. The *Addendum* to this publication identifies drugs that qualify under the 1984 Amendments for periods of exclusivity (during which ANDAs or applications described in Section 505(b)(2) of the Act for those drugs may not be submitted for a specified period of time and, if allowed to be submitted, would be tentatively approved) and provides patent information concerning the listed drugs which also may delay the approval of ANDAs or Section 505(b)(2) applications. The *Addendum* also provides additional information that may be helpful to those submitting a new drug application to the Agency.

The Agency intends to use this publication to further its objective of obtaining input and comment on the publication itself and related Agency procedures. Therefore, if you have comments on how the publication can be improved, please send them to the Director, Division of Data Management and Services , Office of Information Technology, Center for Drug and Evaluation and Research, HFD-90, 5600 Fishers Lane, Rockville, MD 20857. Comments received are publicly available to the extent allowable under the Freedom of Information regulations.

FDA data supplied by DrugPatentWatch.com

1. INTRODUCTION

1.1 Content and Exclusion

The List is composed of four parts: (1) approved prescription drug products with therapeutic equivalence evaluations; (2) approved over-the-counter (OTC) drug products for those drugs that may not be marketed without NDAs or ANDAs because they are not covered under existing OTC monographs; (3) drug products with approval under Section 505 of the Act administered by the Center for Biologics Evaluation and Research; and (4) a cumulative list of approved products that have never been marketed, have been discontinued from marketing, or have had their approvals withdrawn for other than safety or efficacy reasons subsequent to being discontinued from marketing. This publication also includes indices of prescription and OTC drug products by trade or established name (if no trade name exists) and by applicant name (holder of the approved application). All established names for active ingredients generally conform to official compendial names or *United States Adopted Names* (USAN) as prescribed in (21 CFR 299.4(e)). The latter list includes applicants' names as abbreviated in this publication; in addition, a list of uniform terms is provided. An *Addendum* contains drug patent and exclusivity information for the Prescription and OTC Drug Product Lists, and for the Drug Products with Approval under Section 505 of the Act Administered by the Center for Biologics Evaluation and Research.

This publication also includes additional information, such as Orphan Drug Product Designations and other data that the Agency deems appropriate to disseminate.

Prior to the 6th Edition, the publication had excluded OTC drug products and drug products with approval under Section 505 of the Act Administered by the Center for Biologics Evaluation and Research because the main purpose of the publication was to provide information to states regarding FDA's recommendation as to which generic prescription drug products were acceptable candidates for drug product selection. The 1984 Amendments' required the Agency to begin publishing an up-to-date list of all marketed drug products, OTC as well as prescription, that have been approved for safety and efficacy and for which new drug applications are required.

Under the 1984 Amendments, some drug products were given tentative approvals. Prior to the effective date, the Agency will not include drug products with tentative approval in the List; however, they are available in the *FDA Drug Product Approvals List* on the Internet World Wide Web. When the tentative approval becomes a full approval through a subsequent action letter to the application holder, the Agency will list the drug product and the final, effective approval date in the appropriate approved drug product list.

Distributors or repackagers of products on the List are not identified. Because distributors or repackagers are not required to notify FDA when they shift their sources of supply from one approved manufacturer to another, it is not possible to maintain complete information linking product approval with the distributor or repackager handling the products.

1.2 Therapeutic Equivalence-Related Terms

Pharmaceutical Equivalents. Drug products are considered pharmaceutical equivalents if they contain the same active ingredient(s), are of the same dosage form, route of administration and are identical in strength or concentration (e.g., chlordiazepoxide hydrochloride, 5mg capsules). Pharmaceutically equivalent drug products are formulated to contain the same amount of active ingredient in the same dosage form and to meet the same or compendial or other applicable standards (i.e., strength, quality, purity, and identity), but they may differ in characteristics such

FDA data supplied by DrugPatentWatch.com

as shape, scoring configuration, release mechanisms, packaging, excipients (including colors, flavors, preservatives), expiration time, and, within certain limits, labeling.

Pharmaceutical Alternatives. Drug products are considered pharmaceutical alternatives if they contain the same therapeutic moiety, but are different salts, esters, or complexes of that moiety, or are different dosage forms or strengths (e.g., tetracycline hydrochloride, 250mg capsules vs. tetracycline phosphate complex, 250mg capsules; quinidine sulfate, 200mg tablets vs. quinidine sulfate, 200mg capsules). Data are generally not available for FDA to make the determination of tablet to capsule bioequivalence. Different dosage forms and strengths within a product line by a single manufacturer are thus pharmaceutical alternatives, as are extended-release products when compared with immediate- or standard-release formulations of the same active ingredient.

Therapeutic Equivalents. Drug products are considered to be therapeutic equivalents only if they are pharmaceutical equivalents and if they can be expected to have the same clinical effect and safety profile when administered to patients under the conditions specified in the labeling.

FDA classifies as therapeutically equivalent those products that meet the following general criteria: (1) they are approved as safe and effective; (2) they are pharmaceutical equivalents in that they (a) contain identical amounts of the same active drug ingredient in the same dosage form and route of administration, and (b) meet compendial or other applicable standards of strength, quality, purity, and identity; (3) they are bioequivalent in that (a) they do not present a known or potential bioequivalence problem, and they meet an acceptable *in vitro* standard, or (b) if they do present such a known or potential problem, they are shown to meet an appropriate bioequivalence standard; (4) they are adequately labeled; and (5) they are manufactured in compliance with Current Good Manufacturing Practice regulations. *The concept of therapeutic equivalence, as used to develop the List, applies only to drug products containing the same active ingredient(s) and does not encompass a comparison of different therapeutic agents used for the same condition (e.g., propoxyphene hydrochloride vs. pentazocine hydrochloride for the treatment of pain).* Any drug product in the List repackaged and/or distributed by other than the application holder is considered to be therapeutically equivalent to the application holder's drug product even if the application holder's drug product is single source or coded as non-equivalent (e.g., **BN**). Also, distributors or repackagers of an application holder's drug product are considered to have the same code as the application holder. Therapeutic equivalence determinations are not made for unapproved, off-label indications.

FDA considers drug products to be therapeutically equivalent if they meet the criteria outlined above, even though they may differ in certain other characteristics such as shape, scoring configuration, release mechanisms, packaging, excipients (including colors, flavors, preservatives), expiration date/time and minor aspects of labeling (e.g., the presence of specific pharmacokinetic information). When such differences are important in the care of a particular patient, it may be appropriate for the prescribing physician to require that a particular brand be dispensed as a medical necessity. With this limitation, however, FDA believes that products classified as therapeutically equivalent can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product.

Bioavailability. This term means the rate and extent to which the active ingredient or active moiety is absorbed from a drug product and becomes available at the site of action. For drug products that are not intended to be absorbed into the bloodstream, bioavailability may be assessed by measurements intended to reflect the rate and extent to which the active ingredient or active moiety becomes available at the site of action.

Bioequivalent Drug Products. This term describes pharmaceutical equivalent or pharamaceutical alternative products that display comparable bioavailability when

FDA data supplied by DrugPatentWatch.com

studied under similar experimental conditions. Section 505 (j)(7)(B) of the Act describes one set of conditions under which a test and reference listed drug (see Section 1.4) shall be considered bioequivalent:

> the rate and extent of absorption of the test drug do not show a significant difference from the rate and extent of absorption of the reference drug when administered at the same molar dose of the therapeutic ingredient under similar experimental conditions in either a single dose or multiple doses; or
>
> the extent of absorption of the test drug does not show a significant difference from the extent of absorption of the reference drug when administered at the same molar dose of the therapeutic ingredient under similar experimental conditions in either a single dose or multiple doses and the difference from the reference drug in the rate of absorption of the drug is intentional, is reflected in its proposed labeling, is not essential to the attainment of effective body drug concentrations on chronic use, and is considered medically insignificant for the drug.

Where these above methods are not applicable (e.g., for drug products that are not intended to be absorbed into the bloodstream), other *in vivo* or *in vitro* test methods to demonstrate bioequivalence may be appropriate.

Bioequivalence may sometimes be demonstrated using an *in vitro* bioequivalence standard, especially when such an *in vitro* test has been correlated with human *in vivo* bioavailability data. In other situations, bioequivalence may sometimes be demonstrated through comparative clinical trials or pharmacodynamic studies.

1.3 Statistical Criteria for Bioequivalence

Under the Drug Price Competition and Patent Term Restoration Act of 1984, manufacturers seeking approval to market a generic drug must submit data demonstrating that the drug product is bioequivalent to the pioneer (innovator) drug product. A major premise underlying the 1984 law is that bioequivalent drug products are therapeutically equivalent and, therefore, interchangeable.

The standard bioequivalence study is conducted in a crossover fashion in a small number of volunteers, usually with 24 to 36 healthy normal adults. Single doses of the test and reference drugs are administered and blood or plasma levels of the drug are measured over time. Characteristics of these concentration-time curves, such as the area under the curve (AUC) and the peak blood or plasma concentration (C_{max}), are examined by statistical procedures.

Bioequivalence of different formulations of the same drug substance involves equivalence with respect to the rate and extent of drug absorption. Two formulations whose rate and extent of absorption differ by -20%/+25% or less are generally considered bioequivalent. The use of the -20%/+25% rule is based on a medical decision that, for most drugs, a -20%/+25% difference in the concentration of the active ingredient in blood will not be clinically significant.

In order to verify, for a particular pharmacokinetic parameter, that the -20%/+25% rule is satisfied, two one-sided statistical tests are carried out using the log-transformed data from the bioequivalence study. One test is used to verify that the average response for the generic product is no more than 20% below that of the innovator product; the other test is used to verify that the average response for the generic product is no more than 25% above that for the innovator product. The current practice is to carry out the two one-sided tests at the 0.05 level of significance.

FDA data supplied by DrugPatentWatch.com

Computationally, the two one-sided tests are carried out by computing a 90% confidence interval. For approval of ANDAs, in most cases, the generic manufacturer must show that a 90% confidence interval for the ratio of the mean response (usually AUC and C_{max}) of its product to that of the innovator is within the limits of 0.8 and 1.25, using the log-transformed data. If the true average response of the generic product in the population is near 20% below or 25% above the innovator average, one or both of the confidence limits is likely to fall outside the acceptable range and the product will fail the bioequivalence test. Thus, an approved product is likely to differ from that of the innovator by far less than this quantity.

The current practice of carrying out two one-sided tests at the 0.05 level of significance ensures that if the two products truly differ by as much as or more than is allowed by the equivalence criteria (usually -20%/+25% of the innovator product average for the bioequivalence parameters, such as AUC or C_{max}) there is no more than a 5% chance that they will be approved as equivalent. This reflects the fact that the primary concern from the regulatory point of view is the protection of the patient against acceptance of bioequivalence if it does not hold true. The results of a bioequivalence study usually must be acceptable for more than one pharmacokinetic parameter. As such, a generic product that truly differs by -20%/+25% or more from the innovator product with respect to one or more pharmacokinetic parameters would actually have less than a 5% chance of being approved. Different statistical criteria may be used when bioequivalence is demonstrated through comparative clinical trials, pharmacodynamic studies, or comparative *in vitro* methodology.

1.4 Reference Listed Drug

A reference listed drug (21 CFR 314.94(a)(3)) means the listed drug identified by FDA as the drug product upon which an applicant relies in seeking approval of its ANDA.

FDA has identified in the Prescription Drug Product and OTC Drug Product Lists those reference listed drugs to which the *in vivo* bioequivalence and, in some instances, the *in vitro* bioequivalence of the applicant's product is compared. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. Such variations could result if generic drugs were compared to different reference listed drugs. However, in some instances when multiple NDAs are approved for a single drug product, a product not designated as the reference listed drug and not shown to be bioequivalent to the reference listed drug may be shielded from generic competition. A firm wishing to market a generic version of an NDA listed drug that is not designated as the reference listed may petition the Agency through the Citizen Petition procedure (see 21 CFR 10.25(a) and CFR 10.30). When the Citizen Petition is approved, the second NDA will be designated as an additional reference listed drug and the petitioner may submit an Abbreviated New Drug Application citing the designated reference listed drug. Section 1.7, *Therapeutic Equivalence Evaluations Codes — Products meeting necessary bioequivalence requirements* explains the ***(AB, AB1, AB2, AB3***... coding system for multisource drug products listed under the same heading with two reference listed drugs.

In addition, two NDA drug products in which the *in vivo* determination of bioequivalence is self evident and a waiver of *in vivo* bioequivalence is granted by the agency will have the reference listed drug designation assigned to each NDA. The reference listed drug is identified by the symbol "+" in the Prescription and Over-the Counter (OTC) Drug Product Lists. These identified reference listed drugs represent the best judgement of the Division of Bioequivalence at this time. The Prescription and OTC Drug Product Lists identify reference drugs for oral dosage forms, injectables, ophthalmics, otics, and topical products. It is recommended that a firm planning to conduct an *in vivo* bioequivalence study, or planning to manufacture a batch of a drug product for which an *in vivo* waiver of bioequivalence will be

FDA data supplied by DrugPatentWatch.com

requested, contact the Division of Bioequivalence, Office of Generic Drugs, to confirm the appropriate reference listed drug.

1.5 General Policies and Legal Status

The List contains public information and advice. It does not mandate the drug products which may be purchased, prescribed, dispensed, or substituted for one another, nor does it, conversely, mandate the products that should be avoided. To the extent that the List sets forth FDA's evaluations of the therapeutic equivalence of drug products that have been approved, it contains FDA's advice to the public, to practitioners and to the states regarding drug product selection. These evaluations do not constitute determinations that any product is in violation of the Act or that any product is preferable to any other. Therapeutic equivalence evaluations are a scientific judgment based upon evidence, while generic substitution may involve social and economic policy administered by the states, intended to reduce the cost of drugs to consumers. To the extent that the List identifies drug products approved under Section 505 of the Act, it sets forth information that the Agency is required to publish and that the public is entitled to under the Freedom of Information Act. Exclusion of a drug product from the List does not necessarily mean that the drug product is either in violation of Section 505 of the Act, or that such a product is not safe or effective, or that such a product is not therapeutically equivalent to other drug products. Rather, the exclusion is based on the fact that FDA has not evaluated the safety, effectiveness, and quality of the drug product.

1.6 Practitioner/User Responsibilities

Professional care and judgment should be exercised in using the List. Evaluations of therapeutic equivalence for prescription drugs are based on scientific and medical evaluations by FDA. Products evaluated as therapeutically equivalent can be expected, in the judgment of FDA, to have equivalent clinical effect and no difference in their potential for adverse effects when used under the conditions of their labeling. However, these products may differ in other characteristics such as shape, scoring configuration, release mechanisms, packaging, excipients (including colors, flavors, preservatives), expiration date/time, and, in some instances, labeling. If products with such differences are substituted for each other, there is a potential for patient confusion due to differences in color or shape of tablets, inability to provide a given dose using a partial tablet if the proper scoring configuration is not available, or decreased patient acceptance of certain products because of flavor. There may also be better stability of one product over another under adverse storage conditions, or allergic reactions in rare cases due to a coloring or a preservative ingredient, as well as differences in cost to the patient.

FDA evaluation of therapeutic equivalence in no way relieves practitioners of their professional responsibilities in prescribing and dispensing such products with due care and with appropriate information to individual patients. In those circumstances where the characteristics of a specific product, other than its active ingredient, are important in the therapy of a particular patient, the physician's specification of that product is appropriate. Pharmacists must also be familiar with the expiration dates/times and labeling directions for storage of the different products, particularly for reconstituted products, to assure that patients are properly advised when one product is substituted for another.

Multisource and single-source drug products. FDA has evaluated for therapeutic equivalence only multisource prescription drug products, which in most instances means those pharmaceutical equivalents available from more than one manufacturer. For such products, a therapeutic equivalence code is included and, in addition, product information is highlighted in bold face and underlined. Those products with approved applications that are single-source (i.e., there is only one approved product available for that active ingredient, dosage form and route of administration) are also included on the List, but no therapeutic equivalence code is included with such

FDA data supplied by DrugPatentWatch.com

products. Any drug product in the List repackaged and/or distributed by other than the application holder is considered to be therapeutically equivalent to the application holder's drug product even if the application holder's drug product is single source or coded as non-equivalent (e.g., **BN**). Also, although not identified in the List, distributors or repackagers of an application holder's drug product are considered to have the same code as the application holder. The details of these codes and the policies underlying them are discussed in Section 1.7, *Therapeutic Equivalence Evaluations Codes*.

Products on the List are identified by the names of the holders of approved applications (applicants) who may not necessarily be the manufacturer of the product. The applicant may have had its product manufactured by a contract manufacturer and may simply be distributing the product for which it has obtained approval. In most instances, however, the manufacturer of the product is also the applicant. The name of the manufacturer is permitted by regulation to appear on the label, even when the manufacturer is not the marketer.

Although the products on the List are identified by the names of the applicants, circumstances, such as changing corporate ownership, have sometimes made identification of the applicant difficult. The Agency believes, based on continuing document review and communication with firms, that the applicant designations on the List are, in most cases, correct.

To relate firm name information on a product label to that on the List, the following should be noted: the applicant's name always appears on the List. This applies whether the applicant (firm name on the Form FDA 356h in the application) is the marketer (firm name in largest letters on the label) or not. However, the applicant's name may not always appear on the label of the product.

If the applicant is the marketer, its name appears on the List and on the label; if the applicant is not the marketer, and the Agency is aware of a corporate relationship (e.g., parent and subsidiary) between the applicant and the marketer, the name of the applicant appears on the List and both firm names may appear on the label. Firms with known corporate relationships are displayed in Appendix B. If there is no known corporate relationship between the applicant and the marketer, the applicant's name appears on the List; however, unless the applicant is the manufacturer, packager, or distributor, the applicant's name may not appear on the label. In this case, the practitioner, from labeling alone, will not be able to relate the marketed product to an applicant cited in the List, and hence to a specific approved drug product. In such cases, to assure that the product in question is the subject of an approved application, the firm named on the label should be contacted.

To relate trade name (proprietary name) information on a product label to that on the List, the following should be noted: if the applicant is the marketer, its name appears on the List and on the label; if the Agency is aware of a corporate relationship between the applicant and the marketer, the trade name (proprietary name) of the drug product (established drug name if no trade name exists) appears on the List. If a corporate relationship exists between an application holder and a marketer and both firms are distributing the drug product, the FDA reserves the right to select the trade name of either the marketer or the application holder to appear on the List. If there is no known corporate relationship between the applicant and the marketer, the established drug name appears on the List.

Every product on the List is subject at all times to regulatory action. From time to time, approved products may be found in violation of one or more provisions of the Act. In such circumstances, the Agency will commence appropriate enforcement action to correct the violation, if necessary, by securing removal of the product from the market by voluntary recall, seizure, or other enforcement actions. Such regulatory actions are, however, independent of the inclusion of a product on the List. The main criterion for inclusion of a product is that it has an application with an effective approval that has not been withdrawn for safety or efficacy reasons. FDA believes that retention of a violative product on the List will not have any significant adverse

FDA data supplied by DrugPatentWatch.com

health consequences, because other legal mechanisms are available to the Agency to prevent the product's actual marketing. FDA may however, change a product's therapeutic equivalence rating if the circumstances giving rise to the violation change or otherwise call into question the data upon which the Agency's assessment of whether a product meets the criteria for therapeutic equivalence was made.

1.7 Therapeutic Equivalence Evaluations Codes

The coding system for therapeutic equivalence evaluations is constructed to allow users to determine quickly whether the Agency has evaluated a particular approved product as therapeutically equivalent to other pharmaceutically equivalent products (first letter) and to provide additional information on the basis of FDA's evaluations (second letter). With few exceptions, the therapeutic equivalence evaluation date is the same as the approval date.

The two basic categories into which multisource drugs have been placed are indicated by the first letter as follows:

A — Drug products that FDA considers to be <u>therapeutically equivalent</u> to other pharmaceutically equivalent products, i.e., drug products for which:

(1) there are no known or suspected bioequivalence problems. These are designated **AA**, **AN**, **AO**, **AP**, or **AT**, depending on the dosage form; or

(2) actual or potential bioequivalence problems have been resolved with adequate *in vivo* and/or *in vitro* evidence supporting bioequivalence. These are designated **AB**.

B — Drug products that FDA at this time, considers <u>not to be therapeutically equivalent</u> to other pharmaceutically equivalent products, i.e.,

drug products for which actual or potential bioequivalence problems have not been resolved by adequate evidence of bioequivalence. Often the problem is with specific dosage forms rather than with the active ingredients. These are designated **BC**, **BD**, **BE**, **BN**, **BP**, **BR**, **BS**, **BT**, **BX**, or **B***.

Individual drug products have been evaluated as therapeutically equivalent to the reference product in accordance with the definitions and policies outlined below:

"A" CODES

Drug products that are considered to be therapeutically equivalent to other pharmaceutically equivalent products.

"**A**" products are those for which actual or potential bioequivalence problems have been resolved with adequate *in vivo* and/or *in vitro* evidence supporting bioequivalence. Drug products designated with an "**A**" code fall under one of two main policies:

(1) for those active ingredients or dosage forms for which no *in vivo* bioequivalence issue is known or suspected, the information necessary to show bioequivalence between pharmaceutically equivalent products is presumed and considered self-evident based on other data in the application for some dosage forms (e.g., solutions) or satisfied for solid oral dosage forms by

FDA data supplied by DrugPatentWatch.com

a showing that an acceptable *in vitro* dissolution standard is met. A therapeutically equivalent rating is assigned such products so long as they are manufactured in accordance with Current Good Manufacturing Practice regulations and meet the other requirements of their approved applications (these are designated **AA**, **AN**, **AO**, **AP**, or **AT**, depending on the dosage form, as described below); or

(2) for those DESI drug products containing active ingredients or dosage forms that have been identified by FDA as having actual or potential bioequivalence problems, and for post-1962 drug products in a dosage form presenting a potential bioequivalence problem, an evaluation of therapeutic equivalence is assigned to pharmaceutical equivalents only if the approved application contains adequate scientific evidence establishing through *in vivo* and/or *in vitro* studies the bioequivalence of the product to a selected reference product (these products are designated as **AB**).

There are some general principles that may affect the substitution of pharmaceutically equivalent products in specific cases. Prescribers and dispensers of drugs should be alert to these principles so as to deal appropriately with situations that require professional judgment and discretion.

There may be labeling differences among pharmaceutically equivalent products that require attention on the part of the health professional. For example, pharmaceutically equivalent powders to be reconstituted for administration as oral or injectable liquids may vary with respect to their expiration time or storage conditions after reconstitution. An FDA evaluation that such products are therapeutically equivalent is applicable only when each product is reconstituted, stored, and used under the conditions specified in the labeling of that product.

The Agency will use notes in this publication to point out special situations such as potential differences between two drug products that have been evaluated as bioequivalent and otherwise therapeutically equivalent, when they should be brought to the attention of health professionals. These notes are contained in Section 1.8, *Description of Special Situations*.

For example, in rare instances, there may be variations among therapeutically equivalent products in their use or in conditions of administration. Such differences may be due to patent or exclusivity rights associated with such use. When such variations may, in the Agency's opinion, affect prescribing or substitution decisions by health professionals, a note will be added to Section 1.8.

Also, occasionally a situation may arise in which changes in a listed drug product after its approval (for example, a change in dosing interval) may have an impact on the substitutability of already approved generic versions of that product that were rated by the Agency as therapeutically equivalent to the listed product. When such changes in the listed drug product are considered by the Agency to have a significant impact on therapeutic equivalence, the Agency will change the therapeutic equivalence ratings for other versions of the drug product unless the manufacturers of those other versions of the product provide additional information to assure equivalence under the changed conditions. Pending receipt of the additional data, the Agency may add a note to Section 1.8, or, in rare cases, may even change the therapeutic equivalence rating.

In some cases (e.g., Isolyte® S w/ Dextrose 5% in Plastic Container and Plasma-Lyte®148 and Dextrose 5% in Plastic Container), closely related products are listed as containing the same active ingredients, but in somewhat different amounts. In determining which of these products are pharmaceutically equivalent, the Agency has considered products to be pharmaceutically equivalent with labeled strengths of an ingredient that do not vary by more than 1%.

Different salts and esters of the same therapeutic moiety are regarded as pharmaceutical alternatives. For the purpose of this publication, such products are not considered to be therapeutically equivalent. There are no instances in this List where pharmaceutical alternatives are evaluated or coded with regard to therapeutic

FDA data supplied by DrugPatentWatch.com

equivalence. Anhydrous and hydrated entities, as well as different polymorphs, are considered pharmaceutical equivalents and must meet the same standards and, where necessary, as in the case of ampicillin/ampicillin trihydrate, their equivalence is supported by appropriate bioavailability/bioequivalence studies.

The codes in this book are not intended to preclude health care professionals from converting pharmaceutically different concentrations into pharmaceutical equivalents using accepted professional practice.

Where package size variations have therapeutic implications, products so packaged have not been considered pharmaceutically equivalent. For example, some oral contraceptives are supplied in 21-tablet and 28-tablet packets; the 28-tablet packets contain 7 placebo or iron tablets. These two packaging configurations are not regarded as pharmaceutically equivalent; thus, they are not designated as therapeutically equivalent.

Preservatives may differ among some therapeutically equivalent drug products. Differences in preservatives and other inactive ingredients do not affect FDA's evaluation of therapeutic equivalence except in cases where these components may influence bioequivalence or routes of administration.

The specific sub-codes for those drugs evaluated as therapeutically equivalent and the policies underlying these sub-codes follow:

AA — Products in conventional dosage forms not presenting bioequivalence problems

Products coded as **AA** contain active ingredients and dosage forms that are not regarded as presenting either actual or potential bioequivalence problems or drug quality or standards issues. However, all oral dosage forms must, nonetheless, meet an appropriate *in vitro* bioequivalence standard that is acceptable to the Agency in order to be approved.

AB, AB1, AB2, AB3... — Products meeting necessary bioequivalence requirements

Multisource drug products listed under the same heading (i.e., identical active ingredients(s), dosage form, and route(s) of administration) and having the same strength (see Section 1.2, *Therapeutic Equivalence-Related Terms, Pharmaceutical Equivalents)* generally will be coded **AB** if a study is submitted demonstrating bioequivalence.

In certain instances, a number is added to the end of the **AB** code to make a three character code (i.e., **AB1, AB2, AB3, etc.**). Three-character codes are assigned only in situations when more than one reference listed drug of the same strength has been designated under the same heading. Two or more reference listed drugs are generally selected only when there are at least two potential reference drug products which are not bioequivalent to each other. If a study is submitted that demonstrates bioequivalence to a specific listed drug product, the generic product will be given the same three-character code as the reference listed drug it was compared against. For example, Adalat® CC (Miles) and Procardia XL® (Pfizer), extended-release tablets, are listed under the active ingredient nifedipine. These drug products, listed under the same heading, are not bioequivalent to each other. Once generic drug products deemed by FDA to be bioequivalent to either Adalat® CC or Procardia XL® are approved, Adalat® CC and Procardia XL® would be assigned ratings of **AB1** and **AB2**, respectively. The generic drug products bioequivalent to Adalat® CC would be assigned a rating of **AB1** and those bioequivalent to Procardia XL® would be assigned a rating of **AB2**. (The assignment of an **AB1** or **AB2** rating to a specific product does not imply product preference.) Even though drug products of distributors and/or repackagers are not included in the List, they are considered therapeutically equivalent to the

FDA data supplied by DrugPatentWatch.com

application holder's drug product if the application holder's drug product is rated either with an **AB** or three-character code or is single source in the List. Drugs coded as **AB** under a heading are considered therapeutically equivalent only to other drugs coded as **AB** under that heading. Drugs coded with a three-character code under a heading are considered therapeutically equivalent only to other drugs coded with the same three-character code under that heading.

AN — Solutions and powders for aerosolization

Uncertainty regarding the therapeutic equivalence of aerosolized products arises primarily because of differences in the drug delivery system. Solutions and powders intended for aerosolization that are marketed for use in any of several delivery systems are considered to be pharmaceutically and therapeutically equivalent and are coded **AN**. Those products that are compatible only with a specific delivery system or those products that are packaged in and with a specific delivery system are coded **BN**, unless they have met an appropriate bioequivalence standard.

AO — Injectable oil solutions

The absorption of drugs in injectable (parenteral) oil solutions may vary substantially with the type of oil employed as a vehicle and the concentration of the active ingredient. Injectable oil solutions are therefore considered to be pharmaceutically and therapeutically equivalent only when the active ingredient, its concentration, and the type of oil used as a vehicle are all identical.

AP — Injectable aqueous solutions and, in certain instances, intravenous non-aqueous solutions

It should be noted that even though injectable (parenteral) products under a specific listing may be evaluated as therapeutically equivalent, there may be important differences among the products in the general category, *Injectable; Injection*. For example, some injectable products that are rated therapeutically equivalent are labeled for different routes of administration. In addition, some products evaluated as therapeutically equivalent may have different preservatives or no preservatives at all. Injectable products available as dry powders for reconstitution, concentrated sterile solutions for dilution, or sterile solutions ready for injection are all considered to be pharmaceutically and therapeutically equivalent provided they are designed to produce the same concentration prior to injection and are similarly labeled. Consistent with accepted professional practice, it is the responsibility of the prescriber, dispenser, or individual administering the product to be familiar with a product's labeling to assure that it is given only by the route(s) of administration stated in the labeling.

Certain commonly used large volume intravenous products in glass containers are not included on the List (e.g., dextrose injection 5%, dextrose injection 10%, sodium chloride injection 0.9%) since these products are on the market without FDA approval and the FDA has not published conditions for marketing such parenteral products under approved NDAs. When packaged in plastic containers, however, FDA regulations require approved applications prior to marketing. Approval then depends on, among other things, the extent of the available safety data involving the specific plastic component of the product. All large volume parenteral products are manufactured under similar standards, regardless of whether they are packaged in glass or plastic. Thus, FDA has no reason to believe that the packaging container of large volume parenteral drug products that are

FDA data supplied by DrugPatentWatch.com

pharmaceutically equivalent would have any effect on their therapeutic equivalence.

AT — Topical products

There are a variety of topical dosage forms available for dermatologic, ophthalmic, otic, rectal, and vaginal administration, including solutions, creams, ointments, gels, lotions, pastes, sprays, and suppositories. Even though different topical dosage forms may contain the same active ingredient and potency, these dosage forms are not considered pharmaceutically equivalent. Therefore, they are not considered therapeutically equivalent. All solutions and DESI drug products containing the same active ingredient in the same topical dosage form for which a waiver of *in vivo* bioequivalence has been granted and for which chemistry and manufacturing processes are adequate to demonstrate bioequivalence, are considered therapeutically equivalent and coded **AT**. Pharmaceutically equivalent topical products that raise questions of bioequivalence, including all post-1962 non-solution topical drug products, are coded **AB** when supported by adequate bioequivalence data, and **BT** in the absence of such data.

"B" CODES

Drug products that FDA, at this time, considers <u>not to be therapeutically equivalent</u> to other pharmaceutically equivalent products.

"**B**" products, for which actual or potential bioequivalence problems have not been resolved by adequate evidence of bioequivalence, often have a problem with specific dosage forms rather than with the active ingredients. Drug products designated with a "**B**" code fall under one of three main policies:

(1) the drug products contain active ingredients or are manufactured in dosage forms that have been identified by the Agency as having documented bioequivalence problems or a significant potential for such problems and for which no adequate studies demonstrating bioequivalence have been submitted to FDA; or

(2) the quality standards are inadequate or FDA has an insufficient basis to determine therapeutic equivalence; or

(3) the drug products are under regulatory review.

The specific coding definitions and policies for the "**B**" sub-codes are as follows:

B* — Drug products requiring further FDA investigation and review to determine therapeutic equivalence

The code **B*** is assigned to products previously assigned an **A** or **B** code when FDA receives new information that raises a significant question regarding therapeutic equivalence that can be resolved only through further Agency investigation and/or review of data and information submitted by the applicant. The **B*** code signifies that the Agency will take no position regarding the therapeutic equivalence of the product until the Agency completes its investigation and review.

FDA data supplied by DrugPatentWatch.com

BC — Extended-release dosage forms (capsules, injectables and tablets)

An extended-release dosage form is defined by the official compendia as one that allows at least a twofold reduction in dosing frequency as compared to that drug presented as a conventional dosage form (e.g., as a solution or a prompt drug-releasing, conventional solid dosage form).

Although bioavailability studies have been conducted on these dosage forms, they may be subject to bioavailability differences, primarily because firms developing extended-release products for the same active ingredient rarely employ the same formulation approach. FDA, therefore, does not consider different extended-release dosage forms containing the same active ingredient in equal strength to be therapeutically equivalent unless equivalence between individual products in both rate and extent has been specifically demonstrated through appropriate bioequivalence studies. Extended-release products for which such bioequivalence data have not been submitted are coded **BC**, while those for which such data are available have been coded **AB**.

BD — Active ingredients and dosage forms with documented bioequivalence problems

The **BD** code denotes products containing active ingredients with known bioequivalence problems and for which adequate studies have not been submitted to FDA demonstrating bioequivalence. Where studies showing bioequivalence have been submitted, the product has been coded **AB**.

BE — Delayed-release oral dosage forms

A delayed-release dosage form is defined by the official compendia as one that releases a drug (or drugs) at a time other than promptly after administration. Enteric-coated articles are delayed-release dosage forms.

Drug products in delayed-release dosage forms containing the same active ingredients are subject to significant differences in absorption. Unless otherwise specifically noted, the Agency considers different delayed-release products containing the same active ingredients as presenting a potential bioequivalence problem and codes these products **BE** in the absence of *in vivo* studies showing bioequivalence. If adequate *in vivo* studies have demonstrated the bioequivalence of specific delayed-release products, such products are coded **AB**.

BN — Products in aerosol-nebulizer drug delivery systems

This code applies to drug solutions or powders that are marketed only as a component of, or as compatible with, a specific drug delivery system. There may, for example, be significant differences in the dose of drug and particle size delivered by different products of this type. Therefore, the Agency does not consider different metered aerosol dosage forms containing the same active ingredient(s) in equal strengths to be therapeutically equivalent unless the drug products meet an appropriate bioequivalence standard.

BP — Active ingredients and dosage forms with potential bioequivalence problems

FDA's bioequivalence regulations (21 CFR 320.33) contain criteria and procedures for determining whether a specific active ingredient in a specific dosage form has

FDA data supplied by DrugPatentWatch.com

a potential for causing a bioequivalence problem. It is FDA's policy to consider an ingredient meeting these criteria as having a potential bioequivalence problem even in the absence of positive data demonstrating inequivalence. Pharmaceutically equivalent products containing these ingredients in oral dosage forms are coded **BP** until adequate *in vivo* bioequivalence data are submitted. Injectable suspensions containing an active ingredient suspended in an aqueous or oleaginous vehicle have also been coded **BP**. Injectable suspensions are subject to bioequivalence problems because differences in particle size, polymorphic structure of the suspended active ingredient, or the suspension formulation can significantly affect the rate of release and absorption. FDA does not consider pharmaceutical equivalents of these products bioequivalent without adequate evidence of bioequivalence.

BR — Suppositories or enemas that deliver drugs for systemic absorption

The absorption of active ingredients from suppositories or enemas that are intended to have a systemic effect (as distinct from suppositories administered for local effect) can vary significantly from product to product. Therefore, FDA considers pharmaceutically equivalent systemic suppositories or enemas bioequivalent only if *in vivo* evidence of bioequivalence is available. In those cases where *in vivo* evidence is available, the product is coded **AB**. If such evidence is not available, the products are coded **BR**.

BS — Products having drug standard deficiencies

If the drug standards for an active ingredient in a particular dosage form are found by FDA to be deficient so as to prevent an FDA evaluation of either pharmaceutical or therapeutic equivalence, all drug products containing that active ingredient in that dosage form are coded **BS**. For example, if the standards permit a wide variation in pharmacologically active components of the active ingredient such that pharmaceutical equivalence is in question, all products containing that active ingredient in that dosage form are coded **BS**.

BT — Topical products with bioequivalence issues

This code applies mainly to post-1962 dermatologic, ophthalmic, otic, rectal, and vaginal products for topical administration, including creams, ointments, gels, lotions, pastes, and sprays, as well as suppositories not intended for systemic drug absorption. Topical products evaluated as having acceptable clinical performance, but that are not bioequivalent to other pharmaceutically equivalent products or that lack sufficient evidence of bioequivalence, will be coded **BT**.

BX — Drug products for which the data are insufficient to determine therapeutic equivalence

The code **BX** is assigned to specific drug products for which the data that have been reviewed by the Agency are insufficient to determine therapeutic equivalence under the policies stated in this document. In these situations, the drug products are presumed to be therapeutically inequivalent until the Agency has determined that there is adequate information to make a full evaluation of therapeutic equivalence.

FDA data supplied by DrugPatentWatch.com

1.8 Description of Special Situations

Certain drugs present special situations that deserve a more complete explanation than can be provided by the two-letter codes used in the List. These drugs have particular problems with standards of identity, analytical methodology, or bioequivalence that are in the process of resolution. The following drugs are in this category:

Amino Acid and Protein Hydrolysate Injections. These products differ in the amount and kinds of amino acids they contain and, therefore, are not considered pharmaceutical equivalents. For this reason, these products are not considered therapeutically equivalent. At the same time, the Agency believes that it is appropriate to point out that where nitrogen balance is the sole therapeutic objective and individual amino acid content is not a consideration, pharmaceutical alternatives with the same total amount of nitrogen content may be considered therapeutically equivalent.

Follitropin Alfa and Beta. Based on available data derived from physico-chemical tests and bioassay, follitropin alfa and follitropin beta are indistinguishable.

Gaviscon®. Gaviscon® is an OTC product which has been marketed since September 1970. The active ingredients in this product, aluminum hydroxide and magnesium trisilicate, were reviewed by the Agency's OTC Antacid Panel and were considered to be safe and effective ingredients (Category I) by that Panel. However, the tablet failed to pass the antacid test which is required of all antacid products. The Agency, therefore, placed the tablet in Category III for lack of effectiveness. A full NDA with clinical studies was submitted by Marion Laboratories, Inc., and approved by FDA on December 9, 1983. Gaviscon®'s activity in treating reflux acidity is made possible by the physical-chemical properties of the inactive ingredients, sodium bicarbonate and alginic acid. Therefore, *all ANDAs which cite Gaviscon® tablets as the listed drug must contain the inactive ingredients sodium bicarbonate and alginic acid*. A full NDA will be required to support the effectiveness of the drug product if different inactive ingredients are to be substituted for sodium bicarbonate or alginic acid or if different proportions of these ingredients are to be used.

1.9 Therapeutic Equivalence Code Change for a Drug Entity

The Agency will use the following procedures when, in response to a petition or on its own initiative, it is considering a change in the therapeutic equivalence code for approved multi-source drug products. Such changes will generally occur when the Agency becomes aware of new scientific information affecting the therapeutic equivalence of an entire category of drug products in the List (e.g., information concerning the active ingredient or the dosage form), rather than information concerning a single drug product within the category. These procedures will be used when a change in therapeutic equivalence code is under consideration for all drug products found in the Prescription Drug Product List under a specific drug entity and dosage form. The change may be from the code signifying that the drug does not present a bioequivalence problem (e.g., **AA**) to a code signifying a bioequivalence problem (e.g., **BP**), or vice versa. This procedure does not apply to a change of a particular product code (e.g., a change from **BP** to **AB** or from **AB** to **BX**).

Before making a change in a therapeutic equivalence code for an entire category of drugs, the Agency will announce in the *Introduction* to the Cumulative Supplement that it is considering the change, and will invite comment. Comments, along with scientific data, may be sent to the Director, Division of Bioequivalence, Office of Generic Drugs, Center for Drug Evaluation and Research, (MPN-2) HFD-650, 7500 Standish Place, Rockville, MD 20855. The comment period will generally be 60 days in length, and the closing date for comments will be listed in the description of the proposed change for each drug entity.

The most useful type of scientific data submission is an *in vivo* bioavailability/bioequivalence study conducted on batches of the subject drug

FDA data supplied by DrugPatentWatch.com

products. These submissions should present a full description of the analytical procedures and equipment used, a validation of the analytical methodology, including the standard curve, a description of the method of calculating results, and a description of the pharmacokinetic and statistical models used in analyzing the data. Anecdotal or testimonial information is the least useful to the Agency, and such submissions are discouraged. Copies of supporting reports published in the scientific literature or unpublished material, however, are welcome.

1.10 Change of the Therapeutic Equivalence Evaluation for a Single Product

The aforementioned procedure does not apply to a change in a single drug product code. For example, a change in a single drug product's code from **BP** to **AB** as a result of the submission of a bioequivalence study ordinarily will not be the subject of notice and comment. Likewise, a change in a single drug product's code from **AB** to **BX** (e.g., as a result of new information raising a significant question as to bioequivalence) does not require notice and comment. The Agency's responsibility to provide the public with the Agency's most current information related to therapeutic equivalence may require a change in a drug product's code prior to any formal notice and opportunity for the applicant to be heard. The publication in the *Federal Register* of a proposal to withdraw approval of a drug product will ordinarily result in a change in a product's code from **AB** to **BX** if this action has not already been taken.

1.11 Availability of Internal Policy and Procedure Guides

The Office of Generic Drugs maintains internal policy and procedure guides. Although these guides are designed for Office personnel and are subject to change without public notice, they are available to members of the public who may wish to know more about the Office's policies and procedures. Copies of these guides may be obtained from the FDA, Center for Drug Evaluation and Research, HFD-210, Division of Communications Management, Drug Information Branch, 5600 Fishers Lane, Rockville, MD 20857. The Agency welcomes public comment on the policies, procedures, and practices employed in the approval of generic drugs. Such comments may be sent to the Director, Office of Generic Drugs, (MPN-2) HFD-600, 7500 Standish Place, Rockville, MD 20855.

FDA data supplied by DrugPatentWatch.com

2. HOW TO USE THE DRUG PRODUCT LISTS

2.1 Key Sections for Using the Drug Product Lists

This publication contains illustrations, along with Drug Product Lists, indices, and lists of abbreviations and terms which facilitate their use.

Illustrations. The annotated *Drug Product Illustration,* see Section 2.2, and the *Therapeutic Equivalence Evaluations Illustration,* see Section 2.3, are offered to provide further clarification. These depict the format found in the Prescription Drug Product List (the only list in which therapeutic equivalence evaluation codes are displayed).

Drug Product Lists. The Drug Product Lists, arranged alphabetically by active ingredient, contain product identification information (active ingredients, dosage forms, routes of administration, product names, application holders, strengths) for single and multiple ingredient drug products. Also shown are the application number and drug product number (FDA internal computer data use only) and approval dates for those drug products approved on or after January 1, 1982.

If a prescription drug product is available from more than one source (multisource), a therapeutic equivalence code will appear in front of the applicant's name. If a product is therapeutically equivalent to one or more products or to an appropriate reference, it will be designated with a code beginning with "**A**" and the entry will be underlined and printed in bold font for emphasis.

Active ingredient headings for multiple ingredient (combination) drug products are arranged alphabetically. For purposes of this publication, this alphabetical sort takes precedence over United States Pharmacopeia official monograph order (i.e., Reserpine, Hydralazine Hydrochloride, Hydrochlorothiazide). For example, product information labeled as Reserpine, Hydrochlorothiazide and Hydralazine Hydrochloride appears under the active ingredient heading *Hydralazine Hydrochloride; Hydrochlorothiazide; Reserpine.* A cross-reference to the product information (for prescription and OTC products) appears for each additional active ingredient in the product. For combination drug products, the ingredient strengths are separated by semicolons and appear in the same relative sequence as the ingredients in the heading. Available strengths of the dosage form from an applicant appear on separate lines.

To use the Drug Product Lists, determine by alphabetical order the ingredient under which the product information is listed, using the Product Name Index, if necessary. Then, find the ingredient in the applicable Drug Product List. Proceed to the dosage form and route of administration and compare products within that ingredient heading only. Therapeutic equivalence or inequivalence for prescription products is determined on the basis of the therapeutic equivalence codes provided within that specific dosage form heading. The OTC Drug Product List, Discontinued Drug Product List, and Drug Products with Approval under Section 505 of the Act Administered by the Center for Biologics Evaluation and Research List have their data arranged similarly. The Discontinued Drug Product List contains approved products that have never been marketed, have been discontinued from marketing, or have had their approvals withdrawn for other than safety or efficacy reasons subsequent to being discontinued from marketing. All products having a "@" in the 12th Cumulative Supplement of the 17th Edition List have been added to the Discontinued Drug Product List appearing in the 18th Edition.

Orphan Drug Product Designations. Drugs and biologicals that have been granted Orphan Designation pursuant to Section 526 as amended by the Orphan Drug Act [P.L. 97-414, January 4, 1983] are listed in Section 3.5.

FDA data supplied by DrugPatentWatch.com

Product Name Index (Prescription and OTC Drug Product Lists). This is an index of drug products by established or trade name. The second term of each entry indicates the active ingredient name under which product information can be found in the appropriate Drug Product List. For those drug products with multiple active ingredients, only the first active ingredient (in alphabetical order) will appear. OTC products are so designated.

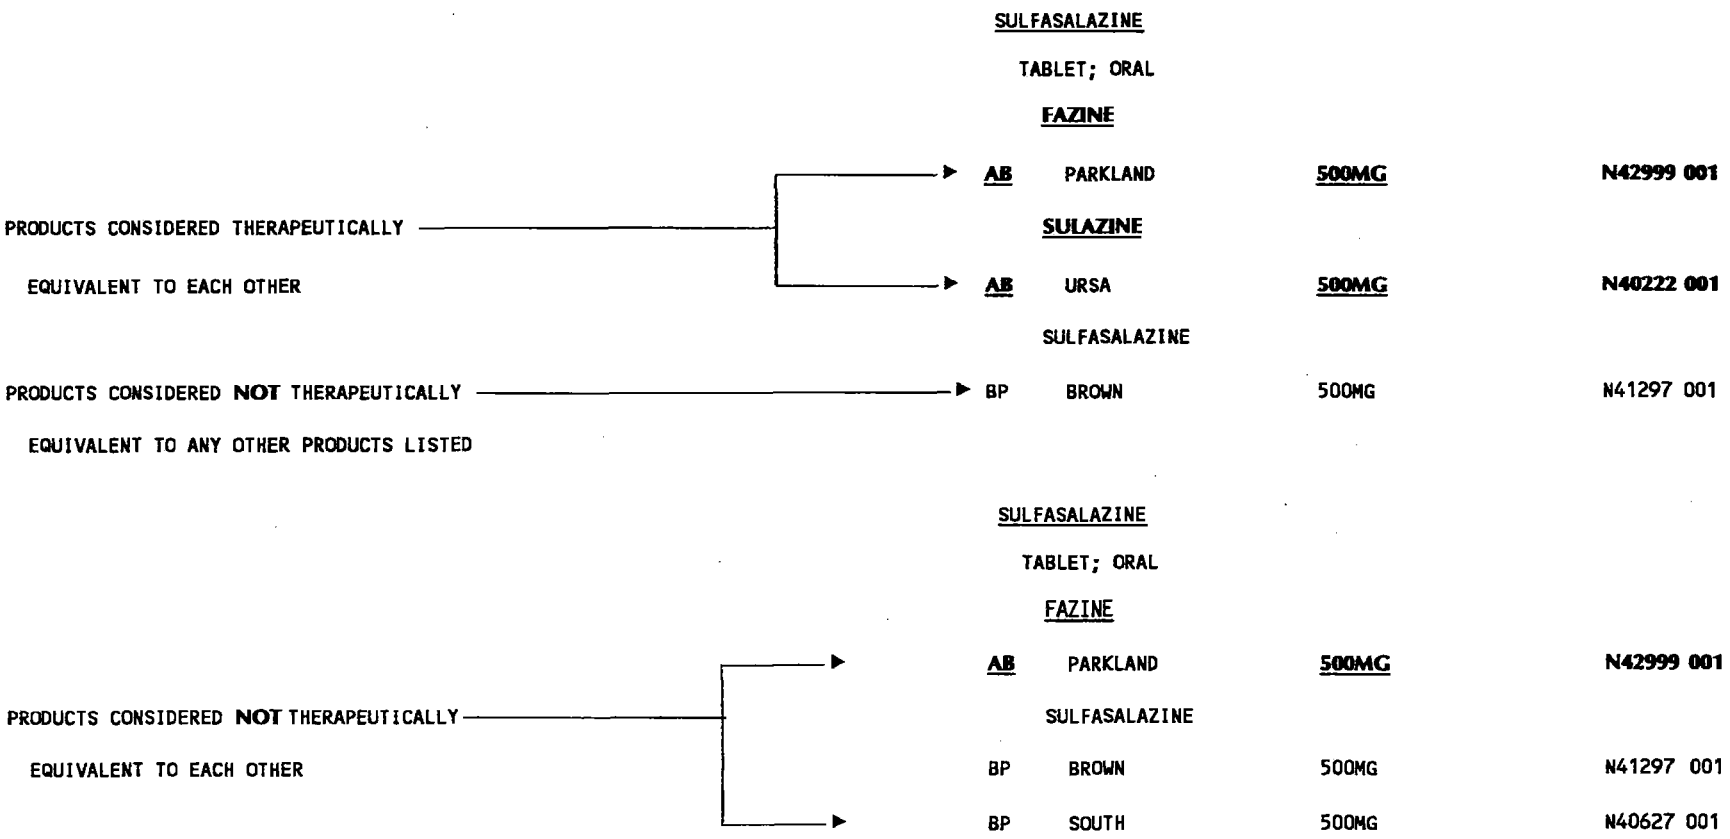
Product Name Index Listed by Applicant (Prescription and OTC Drug Product Lists). This is an index that cross-references applicants to drug products. The bolded and underlined entry represents the applicant name abbreviation used in this publication. Each complete applicant name that is represented by the abbreviated name is marked with an asterisk (*). Listed under each complete applicant name is the first alphabetically arranged ingredient under which product information can be found in the appropriate Drug Product List. OTC products are so designated. To use the Drug Product Lists, determine by alphabetical order the ingredient under which the product information is listed, using the Product Name Index, if appropriate.

Uniform Terms. To improve readability, uniform terms are used to designate dosage forms, routes of administration, and abbreviations used to express strengths. These terms are listed in Appendix C. In some cases, the terms used may differ from those used in product labels and other labeling.

FDA data supplied by DrugPatentWatch.com

2.3 THERAPEUTIC EQUIVALENCE EVALUATIONS ILLUSTRATION

DRUG PRODUCTS CODED **AB** (OR ANY CODE BEGINNING WITH AN "A") UNDER AN INGREDIENT AND DOSAGE FORM HEADING ARE CONSIDERED THERAPEUTICALLY EQUIVALENT ONLY TO OTHER PRODUCTS CODED **AB** (OR ANY CODE BEGINNING WITH AN A") AND **NOT** TO THOSE CODED **BP** (OR ANY CODE BEGINNING WITH "B") AND ANY PRODUCTS NOT LISTED. DRUG PRODUCTS CODED **BP** (OR ANY CODE BEGINNING WITH A "B") ARE **NOT** CONSIDERED THERAPEUTICALLY EQUIVALENT TO ANY OTHER PRODUCT. FOR A COMPLETE EXPLANATION OF THE **TE** CODES REFER TO SECTION 1.7 OF THE *INTRODUCTION.*



NOTE: BOLD FONT AND UNDERLINING DENOTES MULTISOURCE PRODUCTS WHICH ARE CONSIDERED THERAPEUTICALLY EQUIVALENT.

THIS EXAMPLE IS FOR PURPOSES OF ILLUSTRATION ONLY. IT DOES NOT REPRESENT ACTUAL PRODUCTS FROM THE PRESCRIPTION DRUG PRODUCT LIST.

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
8 Cyclopentyl 1,3-dipropylxanthine TN=	Treatment of cystic fibrosis.	SciClone Pharmaceuticals, Inc. 901 Mariner's Island Boulevard Suite 315 San Mateo, CA 94404 DD=03/24/1997 MA= / /
8-methoxsalen TN= Uvadex	For use in conjunction with the UVAR photopheresis to treat diffuse systemic sclerosis.	Therakos, Inc. Oaklands Corporate Center 437 Creamery Way Exton, PA 19341 DD=06/22/1993 MA= / /
8-methoxsalen TN= Uvadex	For the prevention of acute rejection of cardiac allografts.	Therakos, Inc. Oaklands Corporate Center 437 Creamery Way Exton, PA 19341 DD=05/12/1994 MA= / /
9-cis retinoic acid TN= Panretin	Treatment of acute promyelocytic leukemia.	Ligand Pharmaceuticals, Inc. 9393 Towne Centre Drive Suite 100 San Diego, CA 92121 DD=04/10/1992 MA= / /
9-nitro-20-(S)-camptothecin TN=	Treatment of pancreatic cancer.	Stehlin Foundation for Cancer Research 1315 Calhoun, Suite 1818 Houston, TX 77002 DD=09/16/1996 MA= / /
AI-RSA TN=	Treatment of autoimmune uveitis.	AutoImmune, Inc. 128 Spring Street Lexington, MA 02173 DD=10/08/1992 MA= / /
APL 400-020 TN=	Treatment of cutaneous T cell lymphoma.	Apollon, Inc. One Great Valley Parkway Malvern, PA 19355 DD=03/08/1995 MA= / /
Acetylcysteine TN= Mucomyst/Mucomyst 10 IV	Intravenous treatment of patients presenting with moderate to severe acetaminophen overdose.	Apothecon P.O. Box 4500 Princeton, NJ 08543 DD=08/13/1987 MA= / /
Aconiazide TN=	Treatment of tuberculosis.	Lincoln Diagnostics P.O. Box 1128 Decatur, IL 62525 DD=06/20/1988 MA= / /
Adeno-associated viral-based vector cystic fibrosis gene therapy TN=	Treatment of cystic fibrosis.	Targeted Genetics Corporation 1100 Olive Way, Suite 100 Seattle, WA 98101 DD=02/15/1995 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Albendazole TN= Albenza	Treatment of hydatid disease (cystic echinococcosis due to E. granulosus larvae or alveolar echinococcosis due to E. multilocularis larvae).	SmithKline Beecham Pharmaceuticals One Franklin Plaza P.O. Box 7929 Philadelphia, PA 19101 DD=01/17/1996 MA=06/11/1996
Albendazole TN= Albenza	Treatment of neurocysticercosis due to Taenia solium as: 1) chemotherapy of parenchymal, subarachnoidal and racemose (cysts in spinal fluid) neurocysticercosis in symptomatic cases and 2) prophylaxis of epilepsy and other sequelae in asymptomatic neurocysticercosis.	SmithKline Beecham Pharmaceuticals One Franklin Plaza P.O. Box 7929 Philadelphia, PA 19101 DD=01/18/1996 MA=06/11/1996
Aldesleukin TN= Proleukin	Treatment of primary immunodeficiency disease associated with T-cell defects.	Chiron Corporation 4560 Horton Street Emeryville, CA 94608 DD=03/22/1989 MA= / /
Aldesleukin TN= Proleukin	Treatment of metastatic renal cell carcinoma.	Chiron Corporation 4560 Horton Street Emeryville, CA 94608 DD=09/14/1988 MA=05/05/1992
Aldesleukin TN= Proleukin	Treatment of metastatic melanoma.	Chiron Corporation 4560 Horton Street Emeryville, CA 94608 DD=09/10/1996 MA= / /
Alglucerase injection TN= Ceredase	For replacement therapy in patients with Gaucher's disease type I.	Genzyme Corporation One Kendall Square Cambridge, MA 02139 DD=03/11/1985 MA=04/05/1991
Alglucerase injection TN= Ceredase	Replacement therapy in patients with Type II and III Gaucher's disease.	Genzyme Corporation One Kendall Square Cambridge, MA 02139 DD=07/21/1995 MA= / /
Allogeneic peripheral blood mononuclear cells sensitized against patient alloantigens by mixed lymphocyte culture TN= CYTOIMPLANT	Treatment of pancreatic cancer.	Applied Immunotherapeutics, LLC 14132 E. Firestone Boulevard Santa Fe Springs, CA 90670 DD=06/13/1997 MA= / /
Allopurinol sodium TN= Zyloprim for Injection	Management of patients with leukemia, lymphoma, and solid tumor malignancies who are receiving cancer therapy which causes elevations of serum and urinary uric acid levels and who cannot tolerate oral therapy.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=10/16/1992 MA=05/17/1996
Alpha-1-antitrypsin (recombinant DNA Origin) TN=	As supplementation therapy for alpha-1-antitrypsin deficiency in the ZZ phenotype population.	Chiron Corporation 4560 Horton Street Emeryville, CA 94608 DD=01/01/1984 MA= / /

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Alpha-1-proteinase inhibitor (HUMAN) TN= Prolastin	For replacement therapy in the alpha-1-proteinase inhibitor congenital deficiency state.	Bayer Corporation Pharmaceutical Division, Biological Products 400 Morgan Lane New Haven, CT 06516 DD=12/07/1984 MA=12/02/1987
Alpha-galactosidase A TN= Fabrase	Treatment of Fabry's disease.	Desnick, Robert J. M.D. The Mount Sinai School Of Medicine Fifth Avenue at 100th Street, Box 1203 New York, NY 10029 DD=07/20/1990 MA= / /
Alpha-galactosidase A TN= CC-galactosidase	Treatment of alpha-galactosidase A deficiency (Fabry's disease).	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, 55305 DD=06/17/1991 MA= / /
Alpha-melanocyte stimulating hormone TN=	Prevention and treatment of intrinsic acute renal failure due to ischemia.	Star, Robert A., M.D. UT-Southwestern Medical School 5323 Harry Hines Dallas, TX 75235 DD=08/19/1997 MA= / /
Alprostadil TN=	Treatment of severe peripheral arterial occlusive disease (critical limb ischemia) in patients where other procedures, grafts or angioplasty, are not indicated.	Schwarz Pharma P.O. Box 2038 Milwaukee, WI 53201 DD=10/20/1993 MA= / /
Altretamine TN= Hexalen	Treatment of advanced adenocarcinoma of the ovary.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=02/09/1984 MA=12/26/1990
Amifostine TN= Ethyol	For use as a chemoprotective agent for cisplatin in the treatment of advanced ovarian carcinoma.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=05/30/1990 MA=12/08/1995
Amifostine TN= Ethyol	For use as a chemoprotective agent for cyclophosphamide in the treatment of advanced ovarian carcinoma.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=05/30/1990 MA= / /
Amifostine TN= Ethyol	For use as a chemoprotective agent for cisplatin in the treatment of metastatic melanoma.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=05/30/1990 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Amiloride HCl solution for inhalation TN=	Treatment of cystic fibrosis.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=07/18/1990 MA= / /
Aminocaproic acid TN= Caprogel	For the topical treatment of traumatic hyphema of the eye.	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, MN 55305 DD=01/06/1995 MA= / /
Aminosalicylate sodium TN=	Treatment of Crohn's disease.	Syncom Pharmaceuticals, Inc. 66 Hanover Road Florham Park, NJ 07932 DD=04/06/1993 MA= / /
Aminosalicylic acid TN= Paser Granules	Treatment of tuberculosis infections.	Jacobus Pharmaceutical Company 37 Cleveland Lane P.O. Box 5290 Princeton, NJ 08540 DD=02/19/1992 MA=06/30/1994
Aminosidine TN= Gabbromicina	Treatment of tuberculosis.	Kanyok, Thomas P. Pharm.D. University Of Illinois At Chicago College of Pharmacy 833 South Wood Street (m/c886) Rm. 176 Chicago, IL 60612 DD=05/14/1993 MA= / /
Aminosidine TN= Gabbromicina	Treatment of Mycobacterium avium complex.	Kanyok, Thomas P. Pharm.D. University of Illinois at Chicago College of Pharmacy 833 South Wood Street (m/c886) Rm. 176 Chicago, IL 60612 DD=11/15/1993 MA= / /
Aminosidine TN= Paromomycin	Treatment of visceral leishmaniasis (kala-azar).	Kanyok, Thomas P. Pharm.D. University of Illinois at Chicago College of Pharmacy 833 South Wood Street (m/c886) Rm. 176 Chicago, IL 60612 DD=09/09/1994 MA= / /
Amiodarone TN= Amio-Aqueous	Treatment of incessant ventricular tachycardia.	Academic Pharmaceuticals, Inc. 25720 Saunders Road North Lake Forest, IL 60045 DD=08/17/1993 MA= / /
Amiodarone HCl TN= Cordarone	For the acute treatment and prophylaxis of life-threatening ventricular tachycardia or ventricular fibrillation.	Wyeth-Ayerst Laboratories P.O. Box 8299 Philadelphia, PA 19101 DD=03/16/1994 MA=08/03/1995

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Ammonium tetrathiomolybdate TN=	Treatment of Wilson's disease.	Brewer, George J. M.D. University Of Michigan Medical School 4708 Medical Science Building II 0618 Ann Arbor, MI 48109 DD=01/31/1994 MA= / /
Amphotericin B lipid complex TN= Abelcet	Treatment of invasive fungal infections.	Liposome Company, Inc. One Research Way Princeton, NJ 08540 DD=12/03/1996 MA=10/18/1996
Anagrelide TN= Agrelin	Treatment of polycythemia vera.	Roberts Pharmaceutical Corp. Meridian Center III 6 Industrial Way West Eatontown, NJ 07724 DD=06/11/1985 MA= / /
Anagrelide TN= Agrelin	Treatment of thrombocytosis in chronic myelogenous leukemia.	Roberts Pharmaceutical Corp. Meridian Center III 6 Industrial Way West Eatontown, NJ 07724 DD=07/14/1986 MA= / /
Anagrelide TN= Agrylin	Treatment of essential thrombocythemia.	Roberts Pharmaceutical Corp. Meridian Center III 6 Industrial Way West Eatontown, NJ 07724 DD=01/27/1988 MA=03/14/1997
Ananain, comosain TN= Vianain	For the enzymatic debridement of severe burns.	Genzyme Corporation One Kendall Square Cambridge, MA 02139 DD=01/21/1992 MA= / /
Ancestim TN= Stemgen	For use in combination with filgrastim to decrease the number of phereses required to collect peripheral blood progenitor cells capable of providing rapid multi-lineage hematopoietic reconstitution following myelosuppressive or myeloablative therapy.	Amgen, Inc. 1840 Dehavilland Drive Thousand Oaks, CA 91320 DD=07/05/1995 MA= / /
Ancrod TN=	To establish and maintain anticoagulation in heparin-intolerant patients undergoing cardiopulmonary bypass.	Knoll Pharmaceuticals 30 North Jefferson Road Whippany, NJ 07981 DD=11/12/1997 MA= / /
Anti-thymocyte serum TN= Nashville Rabbit Anti-thymocyte Serum	Treatment of allograft rejection, including solid organ (kidney, liver, heart, lung, and pancreas) and bone marrow transplantation.	Applied Medical Research 1600 Hayes Street Nashville, TN 37203 DD=06/02/1993 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Antiepilepsirine TN=	Treatment of drug resistant generalized tonic-clonic epilepsy in children and adults.	Children's Hospital 700 Children's Drive Columbus, OH 43205 DD=03/23/1989 MA= / /
Antihemophilic factor (human) TN= Alphanate	Treatment of von Willebrand's disease.	Alpha Therapeutic Corporation 5555 Valley Boulevard Los Angeles, CA 90032 DD=01/05/1996 MA= / /
Antihemophilic factor (recombinant) TN= Kogenate	Prophylaxis and treatment of bleeding in individuals with hemophilia A or for prophylaxis when surgery is required in individuals with hemophilia A.	Bayer Corporation Pharmaceutical Division, Biological Products 400 Morgan Lane New Haven, CT 06516 DD=09/25/1989 MA=02/25/1993
Antihemophilic factor, human TN= Humate P	Treatment of patients with von Willebrand's disease.	Behringwerke Aktiengesellschaft (AG) Postfach 11 40 D-35001 Marburg Germany, DD=10/16/1992 MA= / /
Antithrombin III (human) TN= Thrombate III	For replacement therapy in congenital deficiency of AT-III for prevention and treatment of thrombosis and pulmonary emboli.	Bayer Corporation Pharmaceutical Division, Biological Products 400 Morgan Lane New Haven, CT 06516 DD=11/26/1984 MA=12/30/1991
Antithrombin III concentrate IV TN= Kybernin	For prophylaxis and treatment of thromboembolic episodes in patients with genetic AT-III deficiency.	Centeon Pharma GmbH Postfach 11 40 D-35001 Marburg Germany, DD=07/02/1985 MA= / /
Antithrombin III human TN= Atnativ	For the treatment of patients with hereditary antithrombin III deficiency in connection with surgical or obstetrical procedures or when they suffer from thromboembolism.	Kabivitrum, Inc. P.O. Box 430 Danville, CA 94526 DD=02/08/1985 MA=12/13/1989
Antithrombin III human TN= Antithrombin III human	Preventing or arresting episodes of thrombosis in patients with congenital AT-III deficiency and/or to prevent the occurrence of thrombosis in patients with AT-III deficiency who have undergone trauma or who are about to undergo surgery or parturition.	American National Red Cross 9312 Old Georgetown Road Bethesda, MD 20814 DD=01/02/1986 MA= / /
Antivenin, polyvalent crotalid (ovine) Fab TN= CroTAb	Treatment of envenomations inflicted by North American crotalid snakes.	Therapeutic Antibodies Inc. 1500 21st Avenue South, Suite 310 Nashville, TN 37212 DD=01/12/1994 MA= / /

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Antivenom (crotalidae) purified (avian) TN=	Treatment of envenomation by poisonous snakes belonging to the Crotalidae family.	Ophidian Pharmaceuticals, Inc. 5445 East Cheryl Parkway Madison, WI 53711 DD=02/12/1991 MA= / /
Apomorphine TN=	Treatment of the on-off fluctuations associated with late-stage Parkinson's disease.	Pentech Pharmaceuticals, Inc. 417 Harvester Court Wheeling, IL 60090 DD=07/17/1995 MA= / /
Apomorphine TN= Zydis	For use as rescue treatment for early morning motor dysfunction in late-stage Parkinson's disease.	Scherer DDS Frankland Road Swindon Wiltshire UK SN5 8RU, DD=10/20/1997 MA= / /
Apomorphine HCl TN=	Treatment of the on-off fluctuations associated with late-stage Parkinson's disease.	Forum Products, Inc. 33 Flying Point Road Southampton, NY 11968 DD=04/22/1993 MA= / /
Aprotinin TN= Trasylol	For prophylactic use to reduce perioperative blood loss and the homologous blood transfusion requirement in patients undergoing cardiopulmonary bypass surgery in the course of repeat coronary artery bypass graft surgery, and in selected cases of primary coronary artery bypass graft surgery where the risk of bleeding is especially high (impaired hemostasis) or where transfusion is unavailable or unacceptable.	Bayer Corporation Pharmaceutical Division 400 Morgan Lane West Haven, CT 06516 DD=11/17/1993 MA=12/29/1993
Arcitumomab TN= 99m Tc-labeled CEA-Scan	Diagnosis and localization of primary, residual, recurrent and metastatic medullary thyroid carcinoma.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=05/10/1996 MA= / /
Arginine butyrate TN=	Treatment of beta-hemoglobinopathies and beta-thalassemia.	Perrine, Susan P., M.D. Boston University Cancer Research Center Boston, MA 02118 DD=04/07/1992 MA= / /
Arginine butyrate TN=	Treatment of sickle cell disease and beta thalassemia.	Vertex Pharmaceuticals Inc. 130 Waverly Street Cambridge, MA 02139 DD=05/25/1994 MA= / /
Atovaquone TN= Mepron	Treatment of AIDS associated Pneumocystis Carinii Pneumonia.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=09/10/1990 MA=11/25/1992

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Atovaquone TN= Mepron	Prevention of Pneumocystis carinii pneumonia (PCP) in high-risk, HIV-infected patients defined by a history of one or more episodes of PCP and/or a peripheral CD4+ (T4 helper/inducer) lymphocyte count less than or equal to 200/mm3.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=08/14/1991 MA= / /
Atovaquone TN= Mepron	Treatment and suppression of Toxoplasma gondii encephalitis.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=03/16/1993 MA= / /
Atovaquone TN= Mepron	Primary prophylaxis of HIV-infected persons at high risk for developing Toxoplasma gondii encephalitis.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=03/16/1993 MA= / /
Autolymphocyte therapy TN=	Treatment of renal cell carcinoma.	Cellcor Inc. 200 Wells Avenue Newton, MA 02159 DD=07/12/1994 MA= / /
B2036-PEG TN= Trovert	Treatment of acromegaly.	Sensus Corporation Suite 430, 98 San Jacinto Boulevard Austin, TX 78701 DD=06/24/1997 MA= / /
Bacitracin TN= Altracin	Treatment of antibiotic-associated pseudomembranous enterocolitis caused by toxins A and B elaborated by Clostridium difficile.	A. L. Laboratories, Inc. One Executive Drive P.O. Box 1399 Fort Lee, NJ 07024 DD=03/13/1984 MA= / /
Baclofen TN= Lioresal Intrathecal	Treatment of intractable spasticity caused by spinal cord injury, multiple sclerosis, and other spinal diseases (including spinal ischemia, spinal tumor, transverse myelitis, cervical spondylosis, and degenerative myelopathy).	Medtronic, Inc. 800 53rd Avenue N.E. Minneapolis, MN 55432 DD=11/10/1987 MA=06/25/1992
Baclofen TN=	Treatment of intractable spasticity due to multiple sclerosis or spinal cord injury.	Infusaid, Inc. 1400 Providence Highway Norwood, MA 02062 DD=12/16/1991 MA= / /
Baclofen TN= Lioresal Intrathecal	Treatment of spasticity associated with cerebral palsy.	Medtronic, Inc. 800 53rd Avenue N.E. P.O. 1250 Minneapolis, MN 55440 DD=09/26/1994 MA= / /
Basiliximab TN= Simulect	Prophylaxis of solid organ rejection.	Novartis Pharmaceuticals Corporation 59 Route 10 East Hanover, NJ 07936 DD=12/12/1997 MA= / /

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Benzoate and phenylacetate TN= Ucephan	For adjunctive therapy in the prevention and treatment of hyperammonemia in patients with urea cycle enzymopathy due to carbamylphosphate synthetase, ornithine, transcarbamylase, or argininosuccinate synthetase deficiency.	Kendall McGaw Laboratories 2525 McGaw Avenue P.O. Box 19791 Irvine, CA 92713 DD=01/21/1986 MA=12/23/1987
Benzylpenicillin, benzylpenicilloic, benzylpenilloic acid TN= PRE-PEN/MDM	Assessing the risk of administrating penicillin when it is the preferred drug of choice in adult patients who have previously received penicillin and have a history of clinical sensitivity.	Schwarz Pharma P.O. Box 2038 Milwaukee, WI 53201 DD=09/29/1987 MA= / /
Beractant TN= Survanta intratracheal suspension	Treatment of neonatal respiratory distress syndrome.	Ross Laboratories 625 Cleveland Avenue Columbus, OH 43215 DD=02/05/1986 MA=07/01/1991
Beractant TN= Survanta intratracheal suspension	Prevention of neonatal respiratory distress syndrome.	Ross Laboratories 625 Cleveland Avenue Columbus, OH 43215 DD=02/05/1986 MA=07/01/1991
Beractant TN= Survanta Intratracheal Suspension	Treatment of full-term newborn infants with respiratory failure caused by meconium aspiration syndrome, persistent pulmonary hypertension of the newborn, or pneumonia and sepsis.	Ross Laboratories 625 Cleveland Avenue Columbus, OH 43215 DD=12/20/1993 MA= / /
Beta alethine TN= Betathine	Treatment of multiple myeloma.	Dovetail Technologies, Inc. Bldg. 337, Paint Branch Drive College Park, MD 20742 DD=03/24/1997 MA= / /
Beta alethine TN= Betathine	Treatment of metastatic melanoma.	Dovetail Technologies, Inc. Bldg. 337, Paint Branch Drive College Park, MD 20742 DD=03/24/1997 MA= / /
Betaine TN= Cystadane	Treatment of homocystinuria.	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, MN 55305 DD=05/16/1994 MA=10/25/1996
Bispecific antibody 520c9x22 TN=	For in vivo serotherapy of patients with ovarian cancer.	Medarex, Inc. 1545 Route 22 East P.O. Box 992 Annandale, NJ 08801 DD=10/05/1993 MA= / /
Bleomycin sulfate TN= Blenoxane	Treatment of malignant pleural effusion.	Bristol-Myers Squibb Pharmaceutical Research Institute P.O. Box 4000 Princeton, NJ 08543 DD=09/17/1993 MA=02/20/1996

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Botulinum toxin type A TN= Botox	Treatment of blepharospasm associated with dystonia in adults (patients 12 years of age and above).	Allergan, Inc. 2525 Dupont Drive P.O. Box 19534 Irvine, CA 92713 DD=03/22/1984 MA=12/29/1989
Botulinum toxin type A TN= Botox	Treatment of strabismus associated with dystonia in adults (patients 12 years of age and above).	Allergan, Inc. 2525 Dupont Drive P.O. Box 19534 Irvine, CA 92713 DD=03/22/1984 MA=12/29/1989
Botulinum toxin type A TN= Botox	Treatment of cervical dystonia.	Allergan, Inc. 2525 Dupont Drive P.O. Box 19534 Irvine, CA 92713 DD=08/20/1986 MA= / /
Botulinum toxin type A TN= Dysport	Treatment of essential blepharospasm.	Porton International, Inc. 1155 15th Street, N.W., #315 Washington, DC 20005 DD=03/23/1989 MA= / /
Botulinum toxin type A TN= Botox	Treatment of dynamic muscle contracture in pediatric cerebral palsy patients.	Allergan, Inc. 2525 Dupont Drive P.O. Box 19534 Irvine, CA 92713 DD=12/06/1991 MA= / /
Botulinum toxin type A TN=	Treatment of synkinetic closure of the eyelid associated with VII cranial nerve aberrant regeneration.	Associated Synapse Biologics 68 Harrison Avenue Boston, MA 02111 DD=09/15/1992 MA= / /
Botulinum toxin type B TN=	Treatment of cervical dystonia.	Athena Neurosciences, Inc. 800 Gateway Boulevard South San Francisco, CA 94080 DD=01/16/1992 MA= / /
Botulinum toxin type F TN=	Treatment of essential blepharospasm.	Porton International, Inc. 1155 15th Street, N.W., #315 Washington, DC 20005 DD=12/05/1991 MA= / /
Botulinum toxin type F TN=	Treatment of spasmodic torticollis (cervical dystonia).	Porton International, Inc. 1155 15th Street, N.W., #315 Washington, DC 20005 DD=10/24/1991 MA= / /
Botulism immune globulin TN=	Treatment of infant botulism.	California Deptment of Health Services 2151 Berkeley Way Berkeley, CA 94704 DD=01/31/1989 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Bovine colostrum TN=	Treatment of AIDS-related diarrhea.	Hastings, Donald DVM 1030 North Parkview Drive Bismarck, ND 58501 DD=11/19/1990 MA= / /
Bovine immunoglobulin concentrate, Cryptosporidium parvum TN= Sporidin-G	Treatment and symptomatic relief of Cryptosporidium parvum infection of the gastrointestinal tract in immunocompromised patients.	GalaGen, Inc. 4001 Lexington Avenue North Arden Hills, MN 55126 DD=03/01/1994 MA= / /
Bovine whey protein concentrate TN= Immuno-C	Treatment of cryptosporidiosis caused by the presence of Cryptosporidium parvum in the gastrointestinal tract of patients who are immunodeficient/immunocompromised or immunocompetent.	Biomune Systems, Inc. 540 Arapeen Drive, Suite 202 Salt Lake City, UT 84108 DD=09/30/1993 MA= / /
Branched chain amino acids TN=	Treatment of amyotrophic lateral sclerosis.	Mount Sinai Medical Center One Gustave L. Levy Place New York, NY 10029 DD=12/23/1988 MA= / /
Bromhexine TN=	Treatment of mild to moderate keratoconjunctivitis sicca in patients with Sjogren's syndrome.	Boehringer Ingelheim 900 Ridgebury Road, Box 368 Ridgefield, CT 06877 DD=05/15/1989 MA= / /
Bromodeoxyuridine TN=	Radiation sensitizer in the treatment of primary brain tumors.	NeoPharm, Inc. 225 East Deerpath, Suite 250 Lake Forest, IL 60045 DD=09/18/1995 MA= / /
Buffered intrathecal electrolyte/dextrose injection TN= Elliotts B Solution	For use as a diluent in the intrathecal administration of methotrexate and cytarabine for the prevention or treatment meningeal leukemia and lymphocytic lymphoma.	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, MN 55305 DD=08/24/1994 MA=09/27/1996
Buprenorphine hydrochloride TN=	Treatment of opiate addiction in opiate users.	Reckitt & Colman Pharmaceuticals, Inc. 1901 Huguenot Road Richmond, VA 23235 DD=06/15/1994 MA= / /
Buprenorphine in combination with naloxone TN=	Treatment of opiate addiction in opiate users.	Reckitt & Colman Pharmaceuticals, Inc. 1901 Huguenot Road Richmond, VA 23235 DD=10/27/1994 MA= / /
Busulfan TN= Spartaject	For use as preparative therapy for malignancies treated with bone marrow transplantation.	Sparta Pharmaceuticals, Inc. P.O. Box 13288 Research Triangle Park, NC 27709 DD=04/21/1994 MA= / /

Imiglucerase TN= Cerezyme	For replacement therapy in patients with types I, II, and III Gaucher's disease.	Genzyme Corporation One Kendall Square Cambridge, MA 02139 DD=11/05/1991 MA=05/23/1994
Immune globulin intravenous, human TN= Gamimune N	Infection prophylaxis in pediatric patients affected with the human immunodeficiency virus.	Bayer Corporation Pharmaceutical Division, Biological Products 400 Morgan Lane New Haven, CT 06516 DD=02/18/1993 MA=12/27/1993
Imported fire ant venom, allergenic extract TN=	For skin testing of victims of fire ant stings to confirm fire ant sensitivity and if positive, for use as immunotherapy for the prevention of IgE-mediated anaphylactic reactions.	ALK Laboratories, Inc. Research Center 27 Village Lane Wallingford, CT 06492 DD=05/12/1992 MA= / /
In-111 murine Mab(2b8-mx-dtpa) & Y-90 murine Mab(2b8-mxdtpa) TN= Melimmune	Treatment of B-cell non-Hodgkin's lymphoma.	IDEC Pharmaceuticals Corporation 3030 Callan Road San Diego, CA 92121 DD=09/06/1994 MA= / /
Indium In 111 murine monoclonal antibody FAB to myosin TN= Myoscint	To aid in the diagnosis of myocarditis.	Centocor, Inc. 244 Great Valley Parkway Malvern, PA 19355 DD=08/07/1989 MA= / /
Inosine pranobex TN= Isoprinosine	Treatment of subacute sclerosing panencephalitis.	Newport Pharmaceuticals 897 West Sixteenth Street Newport Beach, CA 92663 DD=09/20/1988 MA= / /
Interferon alfa-2a TN= Roferon A	Treatment of chronic myelogenous leukemia.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=06/06/1989 MA=10/19/1995
Interferon alfa-2a (recombinant) TN= Roferon-A	Treatment of AIDS related Kaposi's sarcoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=12/14/1987 MA=11/21/1988
Interferon alfa-2a (recombinant) TN= Roferon-A	Treatment of renal cell carcinoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=04/18/1988 MA= / /
Interferon alfa-2a (recombinant) TN= Roferon-A	For use in combination with fluorouracil for the treatment of esophageal carcinoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=10/27/1989 MA= / /

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Interferon alfa-2a (recombinant) TN= Roferon-A	For the concomitant administration with fluorouracil for the treatment of advanced colorectal cancer.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=05/14/1990 MA= / /
Interferon alfa-2a (recombinant) TN= Roferon-A	For the concomitant administration with Teceleukin for the treatment of metastatic renal cell carcinoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07119 DD=05/02/1990 MA= / /
Interferon alfa-2a (recombinant) TN= Roferon-A	For the treatment of metastatic malignant melanoma in combination with Teceleukin.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=05/11/1990 MA= / /
Interferon alfa-2b (recombinant) TN= Intron A	Treatment of AIDS-related Kaposi's sarcoma.	Schering Corporation 2000 Galloping Hill Road Kenilworth, NJ 07033 DD=06/24/1987 MA=11/21/1988
Interferon alfa-nl TN= Wellferon	Treatment of human papillomavirus in patients with severe resistant/recurrent respiratory (laryngeal) papillomatosis.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=10/16/1987 MA= / /
Interferon beta (recombinant human) TN=	Treatment of acute non-A, non-B hepatitis.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=07/24/1992 MA= / /
Interferon beta (recombinant human) TN= Avonex	Treatment of primary brain tumors.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=01/13/1993 MA= / /
Interferon beta (recombinant) TN= R-IFN-beta	For the systemic treatment of cutaneous malignant melanoma.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=04/03/1991 MA= / /
Interferon beta (recombinant) TN= R-IFN-beta	For the systemic treatment of cutaneous T-cell lymphoma.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=04/18/1991 MA= / /
Interferon beta (recombinant) TN= R-IFN-beta	For the intralesional and/or systemic treatment of AIDS-related Kaposi's sarcoma.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=05/09/1991 MA= / /
Interferon beta (recombinant) TN= R-IFN-beta	For the systemic treatment of metastatic renal cell carcinoma.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=02/12/1991 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Interferon beta (recombinant) TN= Rebif	Treatment of symptomatic patients with AIDS including all patients with CD4 T-cell counts less than 200 cells per mm3.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=12/02/1992 MA= / /
Interferon beta-1a TN= Avonex	Treatment of multiple sclerosis.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=12/16/1991 MA=05/17/1996
Interferon beta-1a TN= Rebif	Treatment of patients with secondary progressive multiple sclerosis.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=03/11/1996 MA= / /
Interferon beta-1b TN= Betaseron	Treatment of multiple sclerosis.	Chiron Corp. & Berlex Laboratories 4560 Horton Street Emeryville, CA 94608 DD=11/17/1988 MA=07/23/1993
Interferon gamma 1-b TN= Actimmune	Treatment of chronic granulomatous disease.	Genentech, Inc. 460 Point San Bruno Boulevard South San Francisco, CA 94080 DD=09/30/1988 MA=12/20/1990
Interferon gamma-1b TN= Actimmune	Treatment of renal cell carcinoma.	Genentech, Inc. 460 Point San Bruno Boulevard South San Francisco, CA 94080 DD=12/04/1995 MA= / /
Interferon gamma-1b TN= Actimmune	Treatment of severe congenital osteopetrosis.	Genentech, Inc. 460 Point San Bruno Boulevard South San Francisco, CA 94080 DD=09/30/1996 MA= / /
Interleukin-1 receptor antagonist, human recombinant TN= Antril	Treatment of juvenile rheumatoid arthritis.	Amgen, Inc. 3200 Walnut Street Boulder, CO 80301 DD=09/23/1991 MA= / /
Interleukin-1 receptor antagonist, human recombinant TN= Antril	Prevention and treatment of graft versus host disease in transplant recipients.	Amgen, Inc. 3200 Walnut Street Boulder, CO 80301 DD=10/16/1992 MA= / /
Interleukin-2 TN= Teceleukin	Treatment of metastatic renal cell carcinoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=02/05/1990 MA= / /
Interleukin-2 TN= Teleleukin	Treatment of metastatic malignant melanoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=02/06/1990 MA= / /

FDA data supplied by DrugPatentWatch.com

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Interleukin-2 TN= Teceleukin	In combination with interferon alfa-2a for the treatment of metastatic renal cell carcinoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=05/03/1990 MA= / /
Interleukin-2 TN= Teceleukin	In combination with interferon alfa-2a for the treatment of metastatic malignant melanoma.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=05/11/1990 MA= / /
Iobenguane Sulfate I 131 TN=	For use as a diagnostic adjunct in patients with pheochromocytoma.	CIS-US, Inc. 10 De Angelo Drive Bedford, MA 01730 DD=11/14/1984 MA=03/25/1994
Iodine 131 6B-iodomethyl-19-norcholesterol TN=	For use in adrenal cortical imaging.	Beierwaltes, William M.D. University of Michigan Medical Center B1G412 /0028 University Hospital Ann Arbor, MI 48109 DD=08/01/1984 MA= / /
Iodine I 123 murine monoclonal antibody to alpha-fetoprotein TN=	Detection of hepatocellular carcinoma and hepatoblastoma.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=09/30/1988 MA= / /
Iodine I 123 murine monoclonal antibody to alpha-fetoprotein TN=	Detection of alpha-fetoprotein producing germ cell tumors.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=09/30/1988 MA= / /
Iodine I 123 murine monoclonal antibody to hCG TN=	Detection of hCG producing tumors such as germ cell and trophoblastic cell tumors.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=11/07/1988 MA= / /
Iodine I 131 murine monoclonal antibody IgG2a to B cell TN= Immurait, Ll-2-I-131	Treatment of B-cell leukemia and B-cell lymphoma.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=09/18/1989 MA= / /
Iodine I 131 murine monoclonal antibody to alpha-fetoprotein TN=	Treatment of hepatocellular carcinoma and hepatoblastoma.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=09/30/1988 MA= / /
Iodine I 131 murine monoclonal antibody to alpha-fetoprotein TN=	Treatment of alpha-fetoprotein producing germ cell tumors.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=09/30/1988 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
L-baclofen TN= Neuralgon	Treatment of intractable spasticity associated with spinal cord injury or multiple sclerosis.	Pharmascience 8400 Darnley Road Montreal, Quebec H4T 1M4 Canada, DD=12/17/1991 MA= / /
L-baclofen TN= Neuralgon	Treatment of intractable spasticity in children with cerebral palsy.	Pharmascience 8400 Darnley Road Montreal, Quebec H4T 1M4 Canada, DD=01/30/1992 MA= / /
L-cycloserine TN=	Treatment of Gaucher's disease.	Lev, Meir M.D. The City College, City University Of NY Medical School Convent Avenue at 138 Street New York, NY 10031 DD=08/01/1989 MA= / /
L-cysteine TN=	For the prevention and lessening of photosensitivity in erythropoietic protoporphyria.	Tyson And Associates 12832 South Chadron Avenue Hawthorne, CA 90250 DD=05/16/1994 MA= / /
L-leucovorin TN= Isovorin	For use in conjunction with high-dose methotrexate in the treatment of osteosarcoma.	Lederle Laboratories Division of American Cyanamid Company 401 N. Middletown Road Pearl River, NY 10965 DD=08/01/1991 MA= / /
L-leucovorin TN= Isovorin	For use in combination chemotherapy with the approved agent 5-fluorouracil in the palliative treatment of metastatic adenocarcinoma of the colon and rectum.	Lederle Laboratories Division of American Cyanamid Company 401 N. Middletown Road Pearl River, NY 10965 DD=12/18/1990 MA= / /
L-threonine TN= Threostat	Treatment of amyotrophic lateral sclerosis.	Tyson And Associates 12832 Chadron Avenue Hawthorne, CA 90250 DD=02/06/1989 MA= / /
L-threonine TN=	Treatment of spasticity associated with familial spastic paraparesis.	Interneuron Pharmaceuticals One Ledgement Center 99 Hayden Avenue, Suite 340 Lexington, MA 02173 DD=07/24/1992 MA= / /
Lactobin TN= Lactobin	Treatment of AIDS-associated diarrhea unresponsive to initial antidiarrheal therapy.	Roxane Laboratories, Inc. 1809 Wilson Road P.O. Box 16532 Columbus, OH 43216 DD=09/12/1990 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Metronidazole TN= Metrogel	Treatment of perioral dermatitis.	Galderma Laboratories, Inc. P.O. Box 331329 Fort Worth, TX 76163 DD=10/24/1991 MA= / /
Metronidazole (topical) TN= Flagyl	Treatment of grade III and IV, anaerobically infected, decubitus ulcers.	Searle 4901 Searle Parkway Skokie, IL 60077 DD=11/24/1987 MA= / /
Metronidazole (topical) TN= Metrogel	Treatment of acne rosacea.	Galderma Laboratories, Inc. P.O. Box 331329 Fort Worth, TX 76163 DD=10/22/1987 MA=11/22/1988
Microbubble contrast agent TN= Filmix Neurosonographic Contrast Agent	Intraoperative aid in the identification and localization of intracranial tumors.	Cav-Con, Inc. 55 Knollwood Road Farmington, CT 06032 DD=11/16/1990 MA= / /
Midodrine HCl TN= Amatine	Treatment of patients with symptomatic orthostatic hypotension.	Roberts Pharmaceutical Corp. Meridian Center III 6 Industrial Way West Eatontown, NJ 07724 DD=12/05/1996 MA=09/06/1996
Mitoguazone TN= Zyrkamine	Treatment of diffuse non-Hodgkin's lymphoma, including AIDS-related diffuse non-Hodgkin's lymphoma.	ILEX Oncology, Inc. 11550 IH 10 West, Suite 300 San Antonio, TX 78230 DD=03/18/1994 MA= / /
Mitolactol TN=	As adjuvant therapy in the treatment of primary brain tumors.	Biopharmaceutics, Inc. 990 Station Road Bellport, NY 11713 DD=07/12/1995 MA= / /
Mitomycin-C TN=	Treatment of refractory glaucoma as an adjunct to ab externo glaucoma surgery.	IOP Inc. 3100 Airway Avenue, Suite 106 Costa Mesa, CA 92626 DD=08/20/1993 MA= / /
Mitoxantrone TN= Novantrone	Treatment of hormone refractory prostate cancer.	Immunex Corporation 51 University Street Seattle, WA 98101 DD=08/21/1996 MA=11/13/1996
Mitoxantrone HCl TN= Novantrone	Treatment of acute myelogenous leukemia, also referred to as acute nonlymphocytic leukemia.	Lederle Laboratories Division of American Cyanamid Company 401 N. Middletown Road Pearl River, NY 10965 DD=07/13/1987 MA=12/23/1987

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Modafinil TN= Provigil	Treatment of excessive daytime sleepiness in narcolepsy.	Cephalon, Inc. 145 Brandywine Parkway West Chester, PA 19380 DD=03/15/1993 MA= / /
Monoclonal antibodies PM-81 and AML-2-23 TN=	For the exogenous depletion of CD14 and CD15 positive acute myeloid leukemic bone marrow cells from patients undergoing bone marrow transplantation.	Medarex, Inc. 1545 Route 22 East P.O. Box 992 Annandale, NJ 08801 DD=03/12/1990 MA= / /
Monoclonal antibody PM-81 TN=	Adjunctive treatment of acute myelogenous leukemia.	Medarex, Inc. 1545 Route 22 East P.O. Box 992 Annandale, NJ 08801 DD=06/27/1991 MA= / /
Monoclonal antibody for immunization against lupus nephritis TN=	Treatment of lupus nephritis.	VivoRx Autoimmune, Inc. 2825 Santa Monica Blvd., Suite 200 Santa Monica, CA 90404 DD=01/07/1993 MA= / /
Monoclonal antibody to cytomegalovirus (human) TN=	Prophylaxis of cytomegalovirus disease in patients undergoing solid organ transplantation.	Protein Design Labs, Inc. 2375 Garcia Avenue Mountain View, CA 94043 DD=09/13/1991 MA= / /
Monoclonal antibody to cytomegalovirus (human) TN=	Treatment of cytomegalovirus retinitis in patients with AIDS.	Protein Design Labs, Inc. 2375 Garcia Avenue Mountain View, CA 94043 DD=11/15/1991 MA= / /
Monoclonal antibody to hepatitis B virus (human) TN=	Prophylaxis of hepatitis B reinfection in patients undergoing liver transplantation secondary to end-stage chronic hepatitis B infection.	Protein Design Labs, Inc. 2375 Garcia Avenue Mountain View, CA 94043 DD=06/17/1991 MA= / /
Monoclonal antibody-B43.13 TN= Ovarex MAb-B43.13	Treatment of epithelial ovarian cancer.	AltaRex, Inc. 1134 Dentistry-Pharmacy Building University of Alberta Edmonton, Alberta, Canada, DD=11/25/1996 MA= / /
Monolaurin TN= Glylorin	Treatment of congenital primary ichthyosis.	Glaxo Wellcome Inc. 5 Moore Drive Research Triangle Park, NC 27709 DD=04/29/1993 MA= / /
Monooctanoin TN= Moctanin	For dissolution of cholesterol gallstones retained in the common bile duct.	Ethitek Pharmaceuticals, Inc. 7855 Gross Point Road, Unit L Skokie, IL 60077 DD=05/30/1984 MA=10/31/1985

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Primaquine phosphate TN=	For use in combination with clindamycin hydrochloride in the treatment of Pneumocystis carinii pneumonia associated with AIDS.	Sanofi Winthrop, Inc. 90 Park Avenue New York, NY 10016 DD=07/23/1993 MA= / /
Progesterone TN=	Establishment and maintenance of pregnancy in women undergoing in vitro fertilization or embryo transfer procedures.	Watson Laboratories, Inc. 311 Bonnie Circle Corona, CA 91720 DD=12/22/1994 MA= / /
Propamidine isethionate 0.1% ophthalmic solution TN= Brolene	Treatment of acanthamoeba keratitis.	Bausch & Lomb Pharmaceuticals 1400 North Goodman Street Rochester, NY 14692 DD=03/10/1988 MA= / /
Prostaglandin E1 in lipid emulsion TN=	Treatment of ischemic ulceration of the lower limbs due to peripheral arterial disease.	Alpha Therapeutic Corporation 5555 Valley Boulevard Los Angeles, CA 90032 DD=09/10/1996 MA= / /
Protein C concentrate TN= Protein C Concentrate (human) Vapor Heated, Immuno	For replacement therapy in patients with congenital or acquired protein C deficiency for the prevention and treatment of warfarin-induced skin necrosis during oral anticoagulation.	Immuno Clinical Research Corp. 750 Lexington Avenue, 19th Floor New York, NY 10022 DD=06/19/1992 MA= / /
Protein C concentrate TN= Protein C Concentrate (human) Vapor Heated, Immuno	For replacement therapy in congenital protein C deficiency for the prevention and treatment of thrombosis, pulmonary emboli, and purpura fulminans.	Baxter Healthcare Corporation Hyland Division, Biotech Group 550 North Brand Blvd. Glendale, CA 91203 DD=06/23/1992 MA= / /
Protirelin TN=	Prevention of infant respiratory distress syndrome associated with prematurity.	UCB Pharmaceuticals, Inc. 1950 Lake Park Drive Smyrna, GA 30080 DD=08/24/1993 MA= / /
Pulmonary surfactant replacement, porcine TN= Curosurf	For the treatment and prevention of respiratory distress syndrome in premature infants.	Dey Laboratories 2751 Napa Valley Corporate Drive Napa, CA 94550 DD=08/02/1993 MA= / /
Purified extract of Pseudomonas aeruginosa TN= ImmuDyn	Treatment of immune thrombocytopenia purpura where it is required to increase platelet counts.	DynaGen, Inc. 99 Erie Street Cambridge, MA 02139 DD=09/22/1997 MA= / /
Purified type II collagen TN= Colloral	Treatment of juvenile rheumatoid arthritis.	AutoImmune, Inc. 128 Spring Street Lexington, MA 02173 DD=02/09/1995 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
R-VIII SQ TN= ReFacto	For long-term and/or hospital treatment of hemophilia A or for treatment of patients with hemophilia A in connection with surgical procedures.	Genetics Institute, Inc. 87 CambridgePark Drive Cambridge, MA 02140 DD=02/08/1996 MA= / /
RGG0853, E1A lipid complex TN=	Treatment of ovarian cancer.	Targeted Genetics Corporation 1100 Olive way, Suite 100 Seattle, WA 98101 DD=10/27/1997 MA= / /
RII retinamide TN=	Treatment of myelodysplastic syndromes.	Sparta Pharmaceuticals, Inc. P.O. Box 13288 Research Triangle Park, NC 27709 DD=05/06/1993 MA= / /
Recombinant human CD4 immunoglobulin G TN=	Treatment of AIDS resulting from infection with HIV-1.	Genentech, Inc. 460 Point San Bruno Boulevard South San Francisco, CA 94080 DD=08/30/1990 MA= / /
Recombinant human acid alpha-glucosidase TN=	Treatment of glycogen storage disease type II.	Chen, Y.T., M.D., Ph.D. Department of Pediatrics Duke University Medical Center Durham, NC 27710 DD=08/19/1997 MA= / /
Recombinant human alpha-L-iduronidase TN=	Treatment of patients with mucopolysaccharidosis-I.	BioMarin Pharmaceuticals, Inc. 11 Pimental Court Novato, CA 94949 DD=09/24/1997 MA= / /
Recombinant human gelsolin TN=	Treatment of the respiratory symptoms of cystic fibrosis.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02124 DD=01/12/1994 MA= / /
Recombinant human gelsolin TN=	Treatment of acute and chronic respiratory symptoms of bronchiectasis.	Biogen, Inc. 14 Cambridge Center Cambridge, MA 02142 DD=03/06/1995 MA= / /
Recombinant human insulin-like growth factor-I TN=	Treatment of post-poliomyelitis syndrome.	Cephalon, Inc. 145 Brandywine Parkway West Chester, PA 19380 DD=10/13/1995 MA= / /
Recombinant human interleukin-12 TN=	Treatment of renal cell carcinoma.	Genetics Institute 87 CambridgePark Drive Cambridge, MA 02140 DD=10/20/1997 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Recombinant human luteinizing hormone TN=	For use in association with recombinant human follicle stimulating hormone for the treatment of women with chronic anovulation due to hypogonadotropic hypogonadism.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=10/07/1994 MA= / /
Recombinant human relaxin TN=	Treatment of progressive systemic sclerosis.	Connetics Corporation 3400 West Bayshore Road Palo Alto, CA 94303 DD=11/03/1995 MA= / /
Recombinant human superoxide dismutase TN=	Prevention of bronchopulmonary dysplasia in premature neonates weighing less than 1500 grams.	Bio-Technology General Corp. 70 Wood Avenue, South Iselin, NJ 08830 DD=04/18/1991 MA= / /
Recombinant human thrombopoietin TN=	For use in accelerating platelet recovery in patients undergoing hematopoietic stem cell transplantation.	Genentech, Inc. 1 DNA Way South San Francisco, CA 94080 DD=09/29/1997 MA= / /
Recombinant methionyl brain-derived neurotrophic factor TN=	Treatment of amyotrophic lateral sclerosis.	Amgen, Inc. 1840 Dehavilland Drive Thousand Oaks, CA 91320 DD=11/28/1994 MA= / /
Recombinant methionyl human stem cell factor TN=	Treatment of primary bone marrow failure.	Amgen, Inc. 1840 Dehavilland Drive Thousand Oaks, CA 91320 DD=11/22/1995 MA= / /
Recombinant retroviral vector - glucocerebrosidase TN=	For use as enzyme replacement therapy for patients with types I, II, or III Gaucher disease.	Genetic Therapy, Inc. 938 Clopper Road Gaithersburg, MD 20878 DD=11/15/1993 MA= / /
Recombinant secretory leucocyte protease inhibitor TN=	Treatment of congenital alpha-1 antitrypsin deficiency.	Amgen Inc. 3200 Walnut Street Boulder, CO 80301 DD=03/29/1991 MA= / /
Recombinant secretory leucocyte protease inhibitor TN=	Treatment of cystic fibrosis.	Amgen, Inc. 3200 Walnut Street Boulder, CO 80301 DD=03/29/1991 MA= / /
Recombinant soluble human CD4 (rCD4) TN=	Treatment of AIDS in patients infected with HIV virus.	Genentech, Inc. 460 Point San Bruno Boulevard South San Francisco, CA 94080 DD=03/23/1989 MA= / /
Recombinant vaccinia (human papillomavirus) TN= TA-HPV	Treatment of cervical cancer.	Cantab Pharmaceuticals Research, Ltd. 184 Cambridge Science Park, Milton Road Cambridge CB4 4GN United Kingdom, DD=08/24/1994 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Reduced L-glutathione TN= Cachexon	Treatment of AIDS-associated cachexia.	Telluride Pharmaceutical Corporation 146 Flanders Drive Hillsborough, NJ 08876 DD=02/14/1994 MA= / /
Respiratory Syncytial Virus Immune Globulin (human) TN= Hypermune RSV	Treatment of respiratory syncytial virus lower respiratory tract infections in hospitalized infants and young children.	MedImmune, Inc. 35 West Watkins Mill Road Gaithersburg, MD 20878 DD=09/27/1990 MA= / /
Respiratory syncytial virus immune globulin (Human) TN= Respigam	Prophylaxis of respiratory syncytial virus lower respiratory tract infections in infants and young children at high risk of RSV disease.	MedImmune & Massachussetts Public Health Biologics Labs. 35 West Watkins Mill Road Gaithersburg, MD 20878 DD=09/27/1990 MA=01/18/1996
Retroviral vector, R-GC and GC gene 1750 TN=	Treatment of Gaucher disease.	Genzyme Corporation One Kendall Square Cambridge, MA 02139 DD=05/06/1997 MA= / /
Rho (D) immune globulin intravenous (human) TN= WinRho SD	Treatment of immune thrombocytopenic purpura.	Rh Pharmaceuticals, Inc. 104 Chancellor Matheson Road Winnipeg, Manitoba Canada R3T 2N2, DD=11/09/1993 MA=03/24/1995
Ribavirin TN= Virazole	Treatment of hemorrhagic fever with renal syndrome.	ICN Pharmaceuticals, Inc. 3300 Hyland Avenue Costa Mesa, CA 92626 DD=04/12/1991 MA= / /
Ricin (blocked) conjugated murine MCA (anti-B4) TN=	Treatment of B-cell leukemia and B-cell lymphoma.	ImmunoGen, Inc. 148 Sidney Street Cambridge, MA 02139 DD=11/17/1988 MA= / /
Ricin (blocked) conjugated murine MCA (anti-my9) TN=	Treatment of myeloid leukemia, including AML, and blast crisis of CML.	ImmunoGen, Inc. 148 Sidney Street Cambridge, MA 02139 DD=08/03/1989 MA= / /
Ricin (blocked) conjugated murine MCA (anti-my9) TN=	For use in the ex-vivo treatment of autologous bone marrow and subsequent reinfusion in patients with acute myelogenous leukemia.	ImmunoGen, Inc. 148 Sidney Street Cambridge, MA 02139 DD=02/01/1990 MA= / /
Ricin (blocked) conjugated murine MCA (n901) TN=	Treatment of small cell lung cancer.	ImmunoGen, Inc. 148 Sidney Street Cambridge, MA 02139 DD=01/25/1991 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Decalciferol TN= Osteo-D	Treatment of familial hypophosphatemic rickets.	Lemmon Company 1510 Delp Drive Kulpsville, PA 19443 DD=07/26/1993 MA= / /
Secretory leukocyte protease inhibitor TN=	Treatment of bronchopulmonary dysplasia.	Synergen, Inc. 1885 33rd Street Boulder, CO 80301 DD=06/30/1992 MA= / /
Selegiline HCl TN= Eldepryl	As an adjuvant to levodopa and carbidopa treatment of idiopathic Parkinson's disease (paralysis agitans), postencephalitic Parkinsonism, and symptomatic Parkinsonism.	Somerset Pharmaceuticals, Inc. 777 South Harbor Island Boulevard Tampa, FL 33602 DD=11/07/1984 MA=06/05/1989
Sermorelin acetate TN= Geref	Treatment of idiopathic or organic growth hormone deficiency in children with growth failure.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=09/14/1988 MA=09/26/1997
Sermorelin acetate TN= Geref	Adjunct to gonadotropin therapy in the induction of ovulation in women with anovulatory or oligo-ovulatory infertility who fail to ovulate in response to adequate treatment with clomiphene citrate alone and gonadotropin therapy alone.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=02/13/1990 MA= / /
Sermorelin acetate TN= Geref	Treatment of AIDS-associated catabolism/weight loss.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=12/05/1991 MA= / /
Serratia marcescens extract (polyribosomes) TN= Imuvert	Treatment of primary brain malignancies.	Cell Technology, Inc. 1668 Valtec Lane Boulder, CO 80306 DD=09/07/1988 MA= / /
Short chain fatty acid enema TN= Colomed	Treatment of chronic radiation proctitis.	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, MN 55305 DD=08/19/1997 MA= / /
Short chain fatty acid solution TN= Colomed	Treatment of the active phase of ulcerative colitis with involvement restricted to the left side of the colon.	Orphan Medical, Inc. 13911 Ridgedale Drive Suite 475 Minnetonka, MN 55305 DD=05/29/1990 MA= / /
Sodium Monomercaptoundecahydro-closo-dodecaborate TN= Borocell	For use in boron neutron capture therapy (BNCT) in the treatment of glioblastoma multiforme.	Neutron Technology Corp.& Neutron R&D Partner 877 Main Street, Suite 402 Boise, ID 83702 DD=04/15/1992 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Superoxide dismutase (recombinant human) TN=	Prevention of reperfusion injury to donor organ tissue.	Bio-Technology General Corp. 70 Wood Avenue, South Iselin, NJ 08830 DD=05/17/1988 MA= / /
Suramin TN=	Treatment of hormone-refractory prostate cancer.	Warner-Lambert Company Parke-Davis Pharmaceutical Research Division 2800 Plymouth Road Ann Arbor, MI 48105 DD=05/06/1997 MA= / /
Surface active extract of saline lavage of bovine lungs TN= Infasurf	Treatment and prevention of respiratory failure due to pulmonary surfactant deficiency in preterm infants.	ONY, Inc. 1576 Sweet Home Road Amherst, NY 14228 DD=06/07/1985 MA= / /
Synsorb Pk TN=	Treatment of verocytotoxogenic E. coli infections.	Synsorb Biotech Inc. 201, 1204 Kensington Road, N.W. Calgary, Alberta Canada T2N 3P5, DD=07/17/1995 MA= / /
T4 endonuclease V, liposome encapsulated TN=	To prevent cutaneous neoplasms and other skin abnormalities in xeroderma pigmentosum.	Applied Genetics, Inc. 205 Buffalo Avenue Freeport, NY 11520 DD=06/27/1989 MA= / /
Technetium Tc 99m anti-melanoma murine monoclonal antibody TN= Oncotrac Melanoma Imaging Kit	For use in detecting, by imaging, metastases of malignant melanoma.	NeoRx Corporation 410 West Harrison Seattle, WA 98119 DD=06/02/1987 MA= / /
Technetium Tc-99m murine monoclonal antibody (IgG2a) to B cell TN= LymphoScan	Diagnostic imaging in the evaluation of the extent of disease in patients with histologically confirmed diagnosis of non-Hodgkin's B-cell lymphoma, acute B-cell lymphoblastic leukemia (in children and adults), and chronic B-cell lymphocytic leukemia.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=04/07/1992 MA= / /
Technetium Tc-99m murine monoclonal antibody to hCG TN= Immuraid, hCG-Tc-99m	Detection of hCG producing tumors such as germ cell and trophoblastic cell tumors.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=08/07/1989 MA= / /
Technetium Tc-99m murine monoclonal antibody to human AFP TN= Immuraid, AFP-Tc99m	Detection of hepatocellular carcinoma and hepatoblastoma.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=08/01/1989 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Technetium Tc-99m murine monoclonal antibody to human AFP TN= Immuraid, Afp-tc99m	Detection of alpha-fetoprotein producing germ cell tumors.	Immunomedics, Inc. 300 American Road Morris Plains, NJ 07950 DD=08/01/1989 MA= / /
Teniposide TN= Vumon for injection	Treatment of refractory childhood acute lymphocytic leukemia.	Bristol-Myers Squibb Pharmaceutical Research Institute 5 Research Parkway P.O. Box 5100 Wallingford, CT 06492 DD=11/01/1984 MA=07/14/1992
Teriparatide TN= Parathar	Diagnostic agent to assist in establishing the diagnosis in patients presenting with clinical and laboratory evidence of hypocalcemia due to either hypoparathyroidism or pseudohypoparathyroidism.	Rhone-Poulenc Rorer Pharmaceuticals, Inc. 500 Arcola Road Collegeville, PA 19426 DD=01/09/1987 MA=12/23/1987
Terlipressin TN= Glypressin	Treatment of bleeding esophageal varices.	Ferring Laboratories, Inc. 400 Rella Boulevard, Suite 201 Suffern, NY 10901 DD=03/06/1986 MA= / /
Testosterone TN= Androgel	Treatment of weight loss in AIDS patients with HIV-associated wasting.	Unimed Pharmaceuticals, Inc. 2150 East Lake Cook Road Buffalo Grove, IL 60089 DD=02/05/1996 MA= / /
Testosterone TN= TheraDerm Testosterone Transdermal System	For use as physiologic testosterone replacement in androgen deficient HIV+ patients with an associated weight loss.	TheraTech, Inc. 417 Wakara Way Salt Lake City, UT 84108 DD=09/22/1997 MA= / /
Testosterone propionate ointment 2% TN=	Treatment of vulvar dystrophies.	Star Pharmaceuticals, Inc. 1990 N.W. 44th Street Pompano Beach, FL 33064 DD=07/31/1991 MA= / /
Testosterone sublingual TN=	Treatment of constitutional delay of growth and puberty in boys.	Bio-Technology General Corp. 70 Wood Avenue, South Iselin, NJ 08830 DD=01/16/1991 MA= / /
Tetrabenazine TN=	Treatment of Huntington's disease.	Lifehealth Limited Richmond House, Old Brewery Court, Sandyford Road Newcastle upon Tyne NE2 1XG England, DD=12/11/1997 MA= / /
Thalidomide TN=	Treatment of graft versus host disease in patients receiving bone marrow transplantation.	Pediatric Pharmaceuticals, Inc. 718 Bradford Avenue Westfield, NJ 07090 DD=09/19/1988 MA= / /

FDA data supplied by DrugPatentWatch.com

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Thalidomide TN=	Prevention of graft versus host disease in patients receiving bone marrow transplantation.	Pediatric Pharmaceuticals, Inc. 718 Bradford Avenue Westfield, NJ 07090 DD=09/19/1988 MA= / /
Thalidomide TN=	Treatment and maintenance of reactional lepromatous leprosy.	Pediatric Pharmaceuticals, Inc. 718 Bradford Avenue Westfield, NJ 07090 DD=11/15/1988 MA= / /
Thalidomide TN=	Treatment of graft versus host disease.	Andrulis Research Corporation 11800 Baltimore Avenue, Suite 113 Beltsville, MD 20705 DD=03/05/1990 MA= / /
Thalidomide TN=	Prevention of graft versus host disease.	Andrulis Research Corporation 11800 Baltimore Avenue, Suite 113 Beltsville, MD 20705 DD=03/05/1990 MA= / /
Thalidomide TN=	Treatment of the clinical manifestations of mycobacterial infection caused by Mycobacterium tuberculosis and non-tuberculous mycobacteria.	Celgene Corporation P.O. Box 4914 7 Powder Horn Drive Warren, NJ 07059 DD=01/12/1993 MA= / /
Thalidomide TN=	Treatment of severe recurrent aphthous stomatitis in severely, terminally immunocompromised patients.	Celgene Corporation P.O. Box 4914 7 Powder Horn Srive Warren, NJ 07059 DD=05/01/1995 MA= / /
Thalidomide TN=	Treatment and prevention of recurrent aphthous ulcers in severely, terminally immunocompromised patients.	Andrulis Research Corporation 11800 Baltimore Avenue, Suite 113 Beltsville, MD 20705 DD=05/15/1995 MA= / /
Thalidomide TN= Synovir	Treatment of erythema nodosum leprosum.	Celgene Corporation P.O. Box 4914 7 Powder Horn Drive Warren, NJ 07059 DD=07/26/1995 MA= / /
Thalidomide TN= Synovir	Treatment of HIV-associated wasting syndrome.	Celgene Corporation P.O. Box 4914 7 Powder Horn Drive Warren, NJ 07059 DD=03/11/1996 MA= / /
Thymalfasin TN= Zadaxin	Treatment of chronic active hepatitis B.	SciClone Pharmaceuticals, Inc. 901 Mariner's Island Blvd. San Mateo, CA 94404 DD=05/03/1991 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Tretinoin TN=	Treatment of squamous metaplasia of the ocular surface epithelia (conjunctiva and/or cornea) with mucous deficiency and keratinization.	Hannan Ophthalmic Marketing Services, Inc 163 Meetinghouse Road Duxbury, MA 02332 DD=04/15/1985 MA= / /
Tretinoin TN= Vesanoid	Treatment of acute promyelocytic leukemia.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=10/24/1990 MA=11/22/1995
Tretinoin TN= Atragen	Treatment of acute and chronic leukemia.	Aronex Pharmaceuticals, Inc. 3400 Research Forest Drive The Woodlands, TX 77381 DD=01/14/1993 MA= / /
Trientine HCl TN= Cuprid	Treatment of patients with Wilson's disease who are intolerant, or inadequately responsive to penicillamine.	Merck Sharp & Dohme Research Division Of Merck And Company West Point, PA 19486 DD=12/24/1984 MA=11/08/1985
Trimetrexate glucuronate TN=	Treatment of metastatic carcinoma of the head and neck (i.e. buccal cavity, pharynx, and larynx).	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=07/25/1985 MA= / /
Trimetrexate glucuronate TN=	Treatment of metastatic colorectal adenocarcinoma.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=07/25/1985 MA= / /
Trimetrexate glucuronate TN=	Treatment of pancreatic adenocarcinoma.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=07/25/1985 MA= / /
Trimetrexate glucuronate TN= Neutrexin	Treatment of Pneumocystis carinii pneumonia in AIDS patients.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=05/15/1986 MA=12/17/1993
Trimetrexate glucuronate TN=	Treatment of patients with advanced non-small cell carcinoma of the lung.	U.S. Bioscience, Inc. One Tower Bridge 100 Front Street West Conshohocken, PA 19428 DD=01/13/1988 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Tiopronin TN= Thiola	Prevention of cystine nephrolithiasis in patients with homozygous cystinuria.	Pak, Charles Y.C. M.D. The University of Texas Health Scienc Center at Dallas 5323 Harry Hines Boulevard Dallas, TX 75235 DD=01/17/1986 MA=08/11/1988
Tiratricol TN= Triacana	For use in combination with levo-thyroxine to suppress thyroid stimulating hormone in patients with well-differentiated thyroid cancer who are intolerant to adequate doses of levo-thyroxine alone.	Marcofina Laboratoires Laphal Laboratoires 48 bis rue des Belles Feuilles 75116 Paris, France, DD=08/13/1991 MA= / /
Tizanidine HCl TN= Zanaflex	Treatment of spasticity associated with multiple sclerosis and spinal cord injury.	Athena Neurosciences, Inc. 800 Gateway Boulevard South San Francisco, CA 94080 DD=01/31/1994 MA= / /
Tobramycin for inhalation TN= TOBI	Treatment of bronchopulmonary infections of Pseudomonas aeruginosa in cystic fibrosis patients.	Pathogenesis Corporation 201 Elliott Avenue West, Suite 150 Seattle, WA 98119 DD=10/13/1994 MA=12/22/1997
Topiramate TN= Topamax	Treatment of Lennox-Gastaut syndrome.	R. W. Johnson Pharmaceutical Research Institute Route 202, P.O. Box 300 Raritan, NJ 08869 DD=11/25/1992 MA= / /
Toremifene TN= Fareston	Hormonal therapy of metastatic carcinoma of the breast.	Orion Corporation P.O. Box 65 02101 ESPOO Finland, DD=09/19/1991 MA=05/29/1997
Toremifene TN=	Treatment of desmoid tumors.	Orion Corporation P.O. Box 65 02101 Espoo Finland, DD=08/17/1993 MA= / /
Transforming growth factor-beta 2 TN=	Treatment of full thickness macular holes.	Celtrix Pharmaceuticals, Inc. 3055 Patrick Henry Drive Santa Clara, CA 95054 DD=12/18/1992 MA= / /
Treosulfan TN= Ovastat	Treatment of ovarian cancer.	Medac GmbH Fehlandtstrasse 3 D-20354 Hamburg Germany, DD=05/16/1994 MA= / /

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Uridine 5'-triphosphate TN=	To facilitate the removal of lung secretions in the treatment of patients with primary ciliary dyskinesia.	Inspire Pharmaceuticals, Inc. 4222 Emperor Boulevard, Suite 470 Durham, NC 27703 DD=06/26/1996 MA= / /
Urofollitropin TN= Metrodin	For induction of ovulation in patients with polycystic ovarian disease who have an elevated LH/FSH ratio and who have failed to respond to adequate clomiphene citrate therapy.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=11/25/1987 MA=09/18/1986
Urofollitropin TN= Fertinex	For the initiation and re-initiation of spermatogenesis in adult males with reproductive failure due to hypothalamic or pituitary dysfunction, hypogonadotropic hypogonadism.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=12/05/1997 MA= / /
Urogastrone TN=	For acceleration of corneal epithelial regeneration and healing of stromal incisions from corneal transplant surgery.	Chiron Vision 500 Iolab Drive Claremont, CA 91711 DD=11/01/1984 MA= / /
Ursodiol TN= URSO	Treatment of patients with primary biliary cirrhosis.	Axcan Pharma Inc. 3881, Industriel boulevard Laval, Quebec H7L 4S3 Canada, DD=06/20/1991 MA=12/10/1997
Ursodiol TN= Actigall	Management of the clinical signs and symptoms associated with primary biliary cirrhosis.	Novartis Pharmaceuticals Corporation 59 Route 10 East Hanover, NJ 07936 DD=02/19/1991 MA= / /
Valine, isoleucine and leucine TN= VIL	Treatment of hyperphenylalaninemia.	Leas Research Products 78 Fallon Drive North Haven, CT 06473 DD=01/05/1996 MA= / /
Vasoactive intestinal polypeptide TN=	Treatment of acute esophageal food impaction.	Research Triangle Pharmaceuticals 4364 South Alston Avenue Durham, NC 27713 DD=06/23/1993 MA= / /
Zalcitabine TN=	Treatment of AIDS.	National Cancer Institute, DCT NIH, Executive Plaza North, Room 7-18 Bethesda, MD 20892 DD=12/09/1986 MA= / /
Zalcitabine TN= Hivid	Treatment of AIDS.	Hoffmann-La Roche, Inc. 340 Kingsland Street Nutley, NJ 07110 DD=06/28/1988 MA=06/19/1992

LIST OF ORPHAN PRODUCTS DESIGNATIONS AND APPROVALS

Through December 31, 1997

NAME Generic Name TN=Trade Name	INDICATION DESIGNATED	SPONSOR & ADDRESS DD=Date Designated MA=Marketing Approval
Trisaccharides A and B TN= Biosynject	Treatment of moderate to severe clinical forms of hemolytic disease of the newborn arising from placental transfer of antibodies against blood group substances A and B.	Chembiomed, Ltd. P.O. Box 8050, Station F Edmonton, Alberta Canada T6H 4NP, DD=04/12/1987 MA= / /
Trisaccharides A and B TN= Biosynject	For use in ABO-incompatible solid organ transplantation, including kidney, heart, liver and pancreas.	Chembiomed, Ltd. P.O. Box 8050, Station F Edmonton, Alberta Canada T6H 4NP, DD=04/20/1987 MA= / /
Trisaccharides A and B TN= Biosynject	Prevention of ABO medical hemolytic reactions arising from ABO-incompatible bone marrow transplantation.	Chembiomed, Ltd. P.O. Box 8050, Station F Edmonton, Alberta Canada T6H 4NP, DD=04/15/1988 MA= / /
Trisodium citrate concentration TN= Hemocitrate	For use in leukapheresis procedures.	Hemotec Medical Products, Inc. Box 19255 Johnston, RI 02919 DD=06/15/1995 MA= / /
Troleandomycin TN=	Treatment of severe steroid-requiring asthma.	Szefler, Stanley M. M.D. National Jewish Center for Immunology and Respiratory Medicine 1400 Jackson Street Denver, CO 80206 DD=09/21/1989 MA= / /
Tumor necrosis factor-binding protein 1 TN=	Treatment of symptomatic patients with AIDS including all patients with CD4 counts less than 200 cells per mm3.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=01/06/1993 MA= / /
Tumor necrosis factor-binding protein II TN=	Treatment of symptomatic patients with the AIDS including all patients with CD4 T-cell counts less than 200 cells per mm3.	Serono Laboratories, Inc. 100 Longwater Circle Norwell, MA 02061 DD=01/06/1993 MA= / /
Tyloxapol TN=	Treatment of cystic fibrosis.	Kennedy & Hoidal, M.D.'s University of Utah Health Sciences Center 50 North Medical Drive, Room 4R240 Salt Lake City; UT 84132 DD=03/08/1995 MA= / /
Uridine 5'-triphosphate TN=	Treatment of cystic fibrosis.	Inspire Pharmaceuticals, Inc. 4222 Emperor Boulevard, Suite 470 Durham, NC 27703 DD=12/04/1995 MA= / /

PATENT AND EXCLUSIVITY INFORMATION ADDENDUM

This *Addendum* identifies drugs that qualify under the Drug Price Competition and Patent Term Restoration Act (1984 Amendments) for periods of exclusivity, during which abbreviated new drug applications (ANDAs) and applications described in Section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act (the Act) for those drug products may, in some instances, not be submitted or made effective as described below, and provides patent information concerning the listed drug products. Those drugs that have qualified for Orphan Drug Exclusivity pursuant to Section 527 of the Act are also included in this *Addendum*. This section is arranged in alphabetical order by active ingredient name. For those drug products with multiple active ingredients, only the first active ingredient (in alphabetical order) will appear. For an explanation of the codes used in the *Addendum*, see the *Patent and Exclusivity Terms* page. Exclusivity prevents the submission or effective approval of ANDAs or applications described in Section 505(b)(2) of the Act. It does not prevent the submission or approval of a second full NDA. Applications qualifying for periods of exclusivity are:

(1) A new drug application approved after September 24, 1984, for a drug product all active ingredients (including any ester or salt of the active ingredient) of which had never been approved in any other new drug application under Section 505(b) of the Act. No subsequent ANDA or application described in Section 505(b)(2) of the Act for the same drug may be *submitted* for a period of *five years* from the date of approval of the original application, except that such an application may be *submitted* after *four years* if it contains a certification that a patent claiming the drug is invalid or will not be infringed by the product for which approval is sought.

(2) A new drug application approved after September 24, 1984, for a drug product containing an active ingredient (including any ester or salt of that active ingredient) that has been approved in an earlier new drug application and that includes reports of new clinical investigations (other than bio-availability studies). Such investigations must have been conducted or sponsored by the applicant and must have been essential to approval of the application. If these requirements are met, the approval of a subsequent ANDA or an application described in Section 505(b)(2) of the Act may not be *made effective* for the same drug or use, if for a new indication, before the expiration of *three years* from the date of approval of the original application. If an applicant has exclusivity for a new use or indication, this does not preclude the approval of an ANDA application or 505(b)(2) application for the drug product with indications not covered by the exclusivity.

(3) A supplement to a new drug application for a drug containing a previously approved active ingredient (including any ester or salt of the active ingredient) approved after September 24, 1984, that contains reports of new clinical investigations (other than bioavailability studies) essential to the approval of the supplement and conducted or sponsored by the applicant. The approval of a subsequent application for a change approved in the supplement may not be *made effective* for *three years* from the date of approval of the original supplement.

FDA data supplied by DrugPatentWatch.com

The Act requires that patent information must now be filed with all newly submitted Section 505 drug applications, and that no NDA may be approved after September 24, 1984, without the submission of pertinent patent information to the Agency. The patent numbers and the expiration dates of appropriate patents claiming drug products that are the subject of approved applications will be published in this *Addendum* or in the monthly Cumulative Supplement to this publication. Patent information on unapproved applications or on patents beyond the scope of the Act (i.e., process or manufacturing patents) will not be published.

The patents that FDA regards as covered by the statutory provisions for submission of patent information are: patents that claim the active ingredient or ingredients; drug product patents, which include formulation/composition patents; and use patents for a particular approved indication or method of using the product. NDA holders or applicants amending or supplementing applications with formulation/composition patent information are asked to declare that the patent(s) is appropriate for publication and refers to an approved product or one for which approval is being sought. The Agency asks all applicants or application holders with use patents to provide information as to the approved indications or uses covered by such patents. This information will be included in the Cumulative Supplement to the List as it becomes available.

Since all parts of this publication are subject to changes, additions, or deletions, the *Addendum* must be used in conjunction with the most current Cumulative Supplement.

I-182	TREATMENT OF GROWTH FAILURE ASSOCIATED WITH TURNER SYNDROME
I-183	MAINTENANCE THERAPY IN THE MANAGEMENT OF MILD TO MODERATE ASTHMA IN PEDIATRIC PATIENTS AGES 6-11
I-184	TREATMENT OF PANIC DISORDER AT A RECOMMENDED DOSE RANGE OF 1 TO 2 MG/DAY (MAXIMUM OF 4MG)
I-185	PREVENTION OF OSTEOPOROSIS IN POSTMENOPAUSAL WOMEN
I-186	TREATMENT OF TINEA (PITYRIASIS) VERSICOLOR CAUSED BY OR PRESUMED TO BE CAUSED BY PITYROSPORUM ORBICULARE (ALSO KNOWN AS MALASSEZIA FURFUR OR M. ORBICULARE)
I-187	PREVENTION OF FRACTURES IN THE TREATMENT OF POSTMENOPAUSAL OSTEOPOROSIS
I-188	TREATMENT OF ACUTE SINUSITIS AND ACUTE EXACERBATION OF CHRONIC SINUSITIS
I-189	TREATMENT OF ACUTE OTITIS MEDIA IN PEDIATRIC PATIENTS
I-190	PLANAR IMAGING AS A SECOND LINE DIAGNOSTIC DRUG AFTER MAMMOGRAPHY TO ASSIST IN THE EVALUATION OF BREAST LESIONS IN PATIENTS WITH AN ABNORMAL MAMMOGRAM OR A PALPABLE BREAST MASS

NEW INDICATION

I-191	ENDOMETRIAL THINNING AGENT PRIOR TO ENDOMETRIAL ABLATION FOR DYSFUNCTIONAL UTERINE BLEEDING
I-192	THE PREVENTION OF DEEP VEIN THROMBOSIS, WHICH MAY LEAD TO PULMONARY EMBOLISM, IN PATIENTS UNDERGOING ABDOMINAL SURGERY WHO ARE AT RISK FOR THROMBOEMBOLIC COMPLICATIONS AND A NEW DOSAGE REGIMEN, 40MG ONCE DAILY, FOR THIS INDICATION
I-193	TREATMENT OF PANIC DISORDER IN A RECOMMENDED DOSE RANGE OF 50 TO 200MG/DAY
I-194	CONGESTIVE HEART FAILURE
I-195	USE OF LANSOPRAZOLE IN COMBINATION WITH CLARITHROMYCIN AND AMOXICILLIN FOR THE ERADICATION OF HELICOBACTER PYLORI IN PATIENTS WITH ACTIVE DUODENAL ULCER DISEASE OR A ONE-YEAR HISTORY OF DUODENAL ULCER
I-196	ACUTE TREATMENT OF ACTIVE BENIGN GASTRIC ULCER
I-197	MAINTENANCE OF HEALING OF DUODENAL ULCER
I-198	USE OF LANSOPRAZOLE IN COMBINATION WITH AMOXICILLIN FOR THE ERADICATION OF HELICOBACTER PYLORI IN PATIENTS WITH ACTIVE DUODENAL ULCER DISEASE OR A ONE-YEAR HISTORY OF A DUODENAL ULCER
I-199	MONOTHERAPY AND COMBINATION THERAPY WITH SULFONYLUREAS IN THE TREATMENT OF TYPE II DIABETES
I-200	TREATMENT OF TINEA (PITYRIASIS) VERSICOLOR
I-201	EMPIRICAL THERAPY FOR FEBRILE NEUTROPENIC PATIENTS
I-202	SECOND-LINE TREATMENT OF AIDS-RELATED KAPOSI'S SARCOMA
I-203	MAINTENANCE OF REMISSION OF ULCERATIVE COLITIS
I-204	USE IN PEDIATRIC PATIENTS BETWEEN THE AGES OF 6 AND 11 FOR THE TREATMENT OF THE NASAL SYMPTOMS OF SEASONAL AND PERENNIAL ALLERGIC RHINITIS
I-205	INITIAL ANTICONVULSANT TREATMENT OF STATUS EPILEPTICUS
I-206	TREATMENT OF EDEMA ASSOCIATED WITH CHRONIC RENAL FAILURE
I-207	FOR THE SUPPRESSION OF RECURRENT EPISODES OF GENITAL HERPES IN IMMUNOCOMPETENT ADULTS
I-208	TREATMENT OF OBSESSIVE COMPULSIVE DISORDER IN THE PEDIATRIC POPULATION
I-209	PAROXYSMAL SUPRAVENTRICULAR TACHYCARDIA (PSVT)
I-210	TO SLOW THE PROGRESSION OF CORONARY ATHEROSCLEROSIS IN PATIENTS WITH CORONARY HEART DISEASE AS PART OF A TREATENT STRATEGY TO LOWER TOTAL AND LDL CHOLESTEROL TO TARGET LEVELS
I-211	FOR USE IN THE PEDIATRIC POPULATION

PATENT USE CODE

U-1	PREVENTION OF PREGNANCY
U-2	TREATMENT OR PROPHYLAXIS OF ANGINA PECTORIS AND ARRHYTHMIA
U-3	TREATMENT OF HYPERTENSION
U-4	PROVIDING PREVENTION AND TREATMENT OF EMESIS AND NAUSEA IN MAMMALS
U-5	METHOD OF PRODUCING BRONCHODILATION
U-6	METHOD OF PRODUCING SYMPATHOMIMETIC EFFECTS
U-7	INCREASING CARDIAC CONTRACTILITY
U-8	ACUTE MYOCARDIAL INFARCTION
U-9	CONTROL OF EMESIS ASSOCIATED WITH ANY CANCER CHEMOTHERAPY AGENT
U-10	DIAGNOSTIC METHOD FOR DISTINGUISHING BETWEEN HYPOTHALAMIC MALFUNCTIONS OR LESIONS IN HUMANS
U-11	TREATMENT OR PROPHYLAXIS OF CARDIAC DISORDERS
U-12	METHOD OF TREATING [A] HUMAN SUFFERING FROM DEPRESSION
U-13	A METHOD FOR TREATING ANXIETY IN A HUMAN SUBJECT IN NEED OF SUCH TREATMENT
U-14	ADJUNCTIVE THERAPY FOR THE PREVENTION AND TREATMENT OF HYPERAMMONEMIA IN THE CHRONIC MANAGEMENT OF PATIENTS WITH UREA CYCLE ENZYMOPATHIES
U-15	METHOD OF LOWERING INTRAOCULAR PRESSURE
U-16	USE IN LUNG SCANNING PROCEDURES

U-18	METHOD FOR INHIBITING GASTRIC SECRETION IN MAMMALS
U-19	TREATMENT OF INFLAMMATION
U-20	A PROCESS FOR TREATING A PATIENT SUFFERING FROM PARKINSON'S SYNDROME AND IN NEED OF TREATMENT
U-21	TREATMENT OF HUMANS SUFFERING UNDESIRED UROTOXIC SIDE EFFECTS CAUSED BY CYTOSTATICALLY ACTIVE ALKYLATING AGENTS
U-22	METHOD OF COMBATTING PATHOLOGICALLY REDUCED CEREBRAL FUNCTIONS AND PERFORMANCE WEAKNESSES, CEREBRAL INSUFFICIENCY AND DISORDERS IN CEREBRAL CIRCULATION AND METABOLISM IN WARM-BLOODED ANIMALS
U-23	METHOD FOR TREATING PROSTATIC CARCINOMA COMPRISING ADMINISTERING FLUTAMIDE
U-24	METHOD FOR TREATING PROSTATE ADENOCARCINOMA COMPRISING ADMINISTERING AN ANTIANDROGEN INCLUDING FLUTAMIDE AND AN LHRH AGONIST
U-25	REDUCING CHOLESTEROL IN CHOLELITHIASIS PATIENTS
U-26	REDUCING CHOLESTEROL GALLSTONES AND/OR FRAGMENTS THEREOF
U-27	DISSOLVING CHOLESTEROL GALLSTONES AND/OR FRAGMENTS THEREOF
U-28	CEREBRAL, CORONARY, PERIPHERAL, VISCERAL AND RENAL ARTERIOGRAPHY, AORTOGRAPHY AND LEFT VENTRICULOGRAPHY
U-29	CT IMAGING OF THE HEAD AND BODY, AND INTRAVENOUS EXCRETORY UROGRAPHY
U-30	CEREBRAL ANGIOGRAPHY, AND VENOGRAPHY
U-31	INTRA-ARTERIAL DIGITAL SUBTRACTION ANGIOGRAPHY
U-32	PALLIATIVE TREATMENT OF PATIENTS WITH OVARIAN CARCINOMA RECURRENT AFTER PRIOR CHEMOTHERAPY, INCLUDING PATIENTS WHO HAVE BEEN PREVIOUSLY TREATED WITH CISPLATIN
U-33	TREATING VIRAL INFECTIONS IN A MAMMAL
U-34	TREATING VIRAL INFECTIONS IN A WARM-BLOODED ANIMAL
U-35	TREATING CYTOMEGALOVIRUS IN A HUMAN WITH AN INJECTABLE COMPOSITION
U-36	METHODS OF TREATING BACTERIAL ILLNESSES
U-37	METHOD OF TREATING GASTROINTESTINAL DISEASE
U-38	TREATMENT OF PAROXYSMAL SUPRAVENTRICULAR TACHYCARDIA
U-39	ANGINA PECTORIS
U-40	METHOD OF TREATMENT OF BURNS
U-41	METHOD OF TREATING CARDIAC ARRHYTHMIAS
U-42	ADJUVANT TREATMENT IN COMBINATION WITH FLUOROURACIL AFTER SURGICAL RESECTION IN PATIENTS WITH DUKES' STAGE C COLON CANCER
U-43	MANAGEMENT OF CHRONIC PAIN IN PATIENTS REQUIRING OPIOID ANALGESIA
U-44	RELIEF OF NAUSEA AND VOMITING
U-45	TREATMENT OF INFLAMMATION AND ANALGESIA
U-46	TREATMENT OF PANIC DISORDER
U-47	STIMULATION OF THE RELEASE OF GROWTH HORMONE
U-48	ANALGESIA
U-49	SYMPTOMATIC CANCER-RELATED HYPERCALCEMIA
U-50	USE IN TREATING INFLAMMATORY DERMATOSES
U-51	BLOOD POOL IMAGING, INCLUDING CARDIAC FIRST PASS AND GATED EQUILIBRIUM IMAGING AND FOR DETECTION OF SITES OF GASTROINTESTINAL BLEEDING
U-52	TREATMENT OF ADULT AND PEDIATRIC PATIENTS (OVER SIX MONTHS OF AGE) WITH ADVANCED HIV INFECTION
U-53	HYPERCALCEMIA OF MALIGNANCY
U-54	REVERSAL AGENT OR ANTAGONIST OF NONDEPOLARIZING NEUROMUSCULAR BLOCKING AGENTS
U-55	TREATMENT OF PAIN
U-56	AID TO SMOKING CESSATION
U-57	OPHTHALMIC USE OF NORFLOXACIN
U-58	METHOD OF TREATING INFLAMMATORY INTESTINAL DISEASES
U-59	METHOD OF TREATING HYPERCHOLESTEROLEMIA
U-60	NASAL ADMINISTRATION OF BUTORPHANOL
U-61	CEREBRAL AND PERIPHERAL ARTERIOGRAPHY AND CT IMAGING OF THE HEAD
U-62	CORONARY ARTERIOGRAPHY, LEFT VENTRICULOGRAPHY, CT IMAGING OF THE BODY, INTRAVENOUS EXCRETORY UROGRAPHY, INTRAVENOUS DIGITAL SUBTRACTION ANGIOGRAPHY AND VENOGRAPHY

PATENT USE CODE

U-109	USE AS AN ADJUNCT TO DIET IN THE TREATMENT OF ELEVATED TOTAL CHOLESTEROL AND LDL-C LEVELS IN PATIENTS WITH PRIMARY HYPERCHOLESTEROLEMIA WHOSE RESPONSE TO DIETARY RESTRICTION OF SATURATED FAT AND CHOLESTEROL AND OTHER NONPHARMACOLOGICAL MEASURES HAS NOT BEEN ADEQUATE
U-110	USE AS A RETRIEVABLE PESSARY
U-111	DIABETES
U-112	CONTRACEPTION
U-113	METHOD OF CONDUCTING A RADIOLOGICAL EXAMINATION OF A PATIENT BY ADMINISTERING TO SAID PATIENT A RADIOPAQUE AMOUNT OF IOPROMIDE
U-114	USE FOR INHIBITING BONE RESORPTION
U-115	USE OF VASODILATORS TO EFFECT AND ENHANCE AN ERECTION (AND THUS TREAT ERECTILE DYSFUNCTION), BY INJECTION INTO THE PENIS
U-116	METHOD OF MYOCARDIAL IMAGING
U-117	TREATMENT OF OCULAR ALLERGIC RESPONSE IN HUMAN EYES
U-118	METHOD OF LOWERING BLOOD SUGAR LEVEL
U-119	TREATMENT OF NASAL HYPERSECRETION
U-120	CONTROLLING OR PREVENTING POST-OPERATIVE INTRAOCULAR PRESSURE RISES ASSOCIATED WITH OPHTHALMIC LASER SURGICAL PROCEDURES
U-121	METHOD OF TREATING CONDITIONS MEDIATED THROUGH HISTAMINE H2-RECEPTORS
U-122	A THERAPEUTIC METHOD FOR CONTROLLING THROMBOSIS
U-123	METHOD FOR CONTROLLING THROMBOSIS AND DECREASING BLOOD HYPERCOAGULATION AND HEMORRHAGING RISKS
U-124	TREATMENT OF ACNE
U-125	TREATING NEUROGENERATIVE DISEASES
U-126	TREATMENT OF GASTRITIS
U-127	METHOD OF PRODUCING NEUROMUSCULAR BLOCKADE
U-128	METHODS FOR TREATMENT OF TUMORS
U-129	METHOD TO DESTROY OR IMPAIR TARGET CELLS
U-130	MANAGEMENT OF PATIENTS WITH MASTOCYTOSIS
U-131	PHOTODAMAGED SKIN
U-132	INHIBITING HIV PROTEASE
U-133	MANAGEMENT OF OBESITY INCLUDING WEIGHT LOSS AND MAINTENANCE IN PATIENTS ON A REDUCED-CALORIE DIET
U-134	TREATMENT OF ACNE VULGARIS
U-135	ANTITUMOR AGENT
U-136	PROCESS FOR WASTE NITROGEN REMOVAL
U-137	METHOD OF TREATING BACTERIAL VAGINOSIS
U-138	TREATMENT OF ALLERGIC RHINITIS
U-139	TREATMENT OF ALLERGIC REACTIONS
U-140	USE OF NORVIR TO INHIBIT HIV PROTEASE OR TO INHIBIT AN HIV INFECTION
U-141	TREATMENT OF ULCERATIVE COLITIS
U-142	METHOD OF TREATING ALLERGIC REACTIONS IN A MAMMAL BY USING THIS ACTIVE METABOLITE
U-143	BIODEGRADABLE SUPERPARAMAGNETIC METAL OXIDES AS CONTRAST AGENTS FOR MR IMAGING
U-144	BIOLOGICALLY DEGRADABLE SUPERPARAMAGNETIC MATERIALS FOR USE IN CLINICAL APPLICATIONS
U-145	BIOLOGICALLY DEGRADABLE SUPERPARAMAGNETIC PARTICLES FOR USE AS NUCLEAR MAGNETIC RESONANCE IMAGING AGENTS
U-146	METHOD OF TREATING SUSCEPTIBLE NEOPLASMS IN MAMMALS
U-147	DETECTION OF GASTROINTESTINAL DISORDERS AND THE SUBSEQUENT BREATH COLLECTION AND MEASUREMENT OF $^{13}CO_2$
U-148	DEVICE FOR COLLECTING A BREATH SAMPLE
U-149	METHOD OF TREATING AN ANIMAL, INCLUDING A HUMAN SUFFERING FROM OR SUSCEPTIBLE TO PSYCHOSIS, ACUTE MANIA OR MILD ANXIETY STATES
U-150	METHOD OF USE FOR CONTROLLING HYPERGLYCEMIA BY ADMINISTRATION OF THIS SUSTAINED RELEASE DOSAGE FORM OF GLIPIZIDE

U-172	TREATMENT OF GENITAL WARTS
U-173	ADMINISTRATION TO A HOST SUFFERING FROM GESTATIONAL DIABETES
U-174	USE AS AN ANTIHISTAMINE AGENT
U-175	METHOD OF TREATING MALIGNANT TUMORS
U-176	METHOD OF TREATING A PATIENT SUFFERING FROM LISTED CONDITIONS, INCLUDING SPECIFIC PSYCHOSIS
U-177	FUNGICIDE
U-178	FACILITATED ADHERENCE OF AGENTS TO SKIN
U-179	ENHANCED CUTANEOUS PENETRATION OF A DERMALLY-APPLIED PHARMACOLOGICALLY ACTIVE AGENT
U-180	TREATMENT OF ADULT AND PEDIATRIC PATIENTS (OVER SIX MONTHS OF AGE) WITH ADVANCED HIV INFECTION
U-181	PRODUCING ALPHA ADRENERGIC ANTAGONISTIC ACTION IN A HOST
U-182	USE OF SALMETEROL IN PATIENTS WITH REVERSIBLE AIRWAY OBSTRUCTION
U-183	TREATMENT OF CONDITIONS CAUSED BY DISTURBANCE OF NEURONAL 5HT FUNCTION
U-184	TREATING ALLERGIC EYE DISEASES IN HUMANS
U-185	METHOD OF TREATING HYPERTENSION
U-186	METHOD FOR TREATING GI DISORDERS CAUSED BY H. PYLORI WHICH COMPRISES ADMINISTRATION OF RANITIDINE BISMUTH CITRATE AND CLARITHROMYCIN FOR A GREATER THAN ADDITIVE EFFECT
U-187	THERAPEUTIC TREATMENT OF CALCIFIC TUMORS
U-188	TREATMENT OF H. PYLORI ASSOCIATED DUODENAL ULCER
U-189	ENHANCEMENT OF THE BIOAVAILABILITY OF THE DRUG SUBSTANCE
U-190	USE OF RITONAVIR IN COMBINATION WITH ANY REVERSE TRANSCRIPTASE INHIBITOR
U-191	METHOD OF TREATMENT FOR CONTROLLING AND LOWERING INTRAOCULAR PRESSURE IN A HUMAN
U-192	USE IN TREATING ALLERGIC REACTIONS
U-193	PSORIASIS
U-194	TREATING AGINA PECTORIS AND HIGH BLOOD PRESSURE
U-195	METHOD FOR THE DIAGNOSIS OF GASTROINTESTINAL DISORDERS BY UREA ISOTOAC OR NITROGEN LABELED CARBON

FDA data supplied by DrugPatentWatch.com
